FLORIDA TRANSPORTATION AND ECONOMIC DEVELOPMENT COUNCIL

FRIDAY, JUNE 22, 2012

10:30 P.M. - 1:00 P.M.

TAB 1 CALL TO ORDER

AGENDA

FLORIDA SEAPORT TRANSPORTATION AND ECONOMIC DEVELOPMENT COUNCIL MEETING

Westin Harbour Island Hotel
725 South Harbour Island Boulevard
Tampa, Florida 33602
813-229-5000

June 22, 2012 10:30 a.m. – 1:00 p.m.

- 1. Call to Order
- 2. Roll Call
- 3. Approval of the Minutes of September 7, 2011 and October 21, 2011 FSTED Council Meeting
- 4. Legislative Report on 2012 Regular Session
 - A. Discussion of Seaport Infrastructure Investment Funding
 - B. Discussion of FSTED Program Changes and Strategic Planning Issues
 - C. Discussion of Environmental and Other Legislative Changes
 - D. Other Issues
- 5. Report on Federal Issues
- 6. Agency Reports
 - A. Florida Department of Transportation
 - 1. Seaport and Waterways Systems Plan Update
 - 2. Freight Plan Update
 - 3. Trade and Logistics Plan Update
 - 4. FDOT "Road Fund" Update
 - 5. Other Issues
 - **B.** Florida Department of Economic Opportunity
 - 1. Florida's Strategic Planning Process
 - 2. Land Use/Planning Issues
- 7. Update on Port Citrus
- 8. Review of Seaport Funding Spend Downs

- 9. Review of FSTED Program Project Application Revisions and Submittal Schedule
- **10. Election of Officers**
- 11. Other Issues
- 12. Next Steps
- 13. Adjournment

TAB 2 ROLL CALL

FLORIDA SEAPORT TRANSPORTATION AND ECONOMIC DEVELOPMENT COUNCIL

ROLL CALL

MEMBER:

DESIGNEE:

STAN PAYNE, CANAVERAL

BRAD THORPE, CITRUS

STEVE CERNAK, EVERGLADES

VAL SCHWEC, FERNANDINA

DON WEST, FT. PIERCE

PAUL ANDERSON, JACKSONVILLE

JIM FITTON, KEY WEST

CARLOS BUQUERAS, MANATEE

BILL JOHNSON, MIAMI

MANNY ALMIRA, PALM BEACH

WAYNE STUBBS, PANAMA CITY

CLYDE MATHIS, PENSACOLA

TOMMY PITTS, PORT ST. JOE

WALTER MILLER, ST. PETERSBURG

RICHARD WAINIO, TAMPA

MICHELLE DENNARD, DEPARTMENT OF ECONOMIC OPPORTUNITY KATHERINE MORRISON

ANANTH PRASAD, DEPARTMENT OF TRANSPORTATION RICH BITER

TAB 3 APPROVAL OF MINUTES OF SEPTEMBER 7, 2011 AND OCTOBER 21, 2011 FSTED COUNCIL MEETING

MEETING SUMMARY

FLORIDA SEAPORT TRANSPORTATION AND ECONOMIC DEVELOPMENT COUNCIL

September 7, 2011 Senate Office Building, The Capitol Tallahassee, Florida

A meeting of the Florida Seaport Transportation and Economic Development (FSTED) Council was held on September 7, 2011, in Tallahassee, Florida. Chairman Richard Wainio called the meeting to order. The Assistant Secretary called the roll. Members present were:

Pat Poston for Stan Payne, Canaveral

Brad Thorpe, Citrus County

Phil Allen, Everglades

Val Schwec, Fernandina

Don West for Faye Outlaw, Ft. Pierce

Paul Anderson, Jacksonville

Bob Armstrong for David McDonald, Manatee

Bill Johnson, Miami

Manny Almira, Palm Beach

Wayne Stubbs, Panama City

Clyde Mathis, Pensacola

Tommy Pitts, Port St. Joe

Walt Miller, St. Petersburg

Richard Wainio, Tampa.

Francis Gibbs for Secretary Ananth Prasad, Florida Department of Transportation

Katherine Morrison for Director Doug Darling, Florida Department of Economic Opportunity

Sheri Coven for Secretary Billy Buzzett, Florida Department of Community Affairs

A quorum was present. Also in attendance were:

Michael Poole, Jacksonville
David Kaufman, Jacksonville
Catherine Kelly, FDOT
Catherine Kelly, FDOT
Dionne Henry, FDOT
Lindsay Ubinas, Citrus County
David Stubbs, Jacksonville
Ram Kancharla, Tampa
David Anderton, Everglades

Eric Green, Jacksonville Sally Patrenos, Patrenos & Associates

Doug Wheeler, FPC Nancy Leikauf, FPC

Toy Keller, FPC Michael Rubin, FPC

Agenda Item 3, Approval of the Minutes of June 23, 2011, FSTED Council Meeting was taken up. A motion was made and passed approving the minutes.

Agenda Item 4, Report from FSTED Seaport Environmental Management Committee (SEMC) was taken up. SEMC Chair, David Kaufman provided the report for the Committee. Mr. Kaufman reminded the members that Florida

seaports had a very productive Regular Session 2011 with respect to environmental issues. Mr. Kaufman informed the members concerning a very positive meeting with representatives from the Florida Department of Environmental Protection, the Army Corps of Engineers, the State Fish and Wildlife Commission and others. Mr. Kaufman stated that an email would be provided to everyone concerning this meeting, and noted that issues such as dredged material management and cooperation with seaports on an efficient and effective regulatory process were topics of discussion.

Agenda Item 5, Discussion on FSTED Council Project Review and Allocation Process Committee was taken up. Chairman Wainio reminded members that he had asked Wayne Stubbs to chair a small committee of seaport and agency representatives to discuss the process for allocation of state funds to seaports (not just Chapter 311 funds) and about the role of ports in the broader process of funding projects that are related to the overall success of the state's transportation system. Mr. Stubbs provided the report for the Committee.

Mr. Stubbs informed the members that the Committee met three times, had excellent participation, and took the role of reviewing the allocation process very seriously. Mr. Stubbs directed the members to the materials in their notebooks and stated that the Committee focused on the process of allocating monies to the ports under the Chapter 311 program. Mr. Stubbs noted that the recommendations could be reviewed by the Council and used in next year's allocation process. Mr. Stubbs informed the members that the broader context of the recommendations was to improve a very valuable program and obtain more buy-in and ownership from our agency partners as we develop the FSTED program through the years.

The first recommended guideline was to distinguish the current FSTED program from other port funding initiatives by concentrating on on-port infrastructure and port expansion projects. This would not require every dollar of the FSTED program to go toward this purpose, but rather require the FSTED program to target these projects. The second recommended guideline was to provide additional consideration to projects proposed by Florida's small ports. These projects must still meet the project standards, but the FSTED Council would work a little harder to meet the needs of small ports. This doesn't mean that small ports receive priority for FSTED program funds, but rather some additional consideration. The third recommended guideline was to support competitiveness of Florida's ports by ensuring that funds are distributed equitably over time based on established standards and criteria. This guideline is not a new concept, but Mr. Stubbs stated that he believed it was the first time the policy was being set in writing.

The Committee also developed a series of recommended criteria for project application approvals. The planning and consistency criteria would provide that projects have to be consistent with section 311.09, F.S. The economic benefit criteria would require a project to maintain existing trade (cargo or cruise), attract new trade to Florida, or support existing port dependent Florida manufacturers or attract new businesses. The readiness criteria would require that projects would be initiated within the next year with matching funds identified. The competitiveness criteria would be a new type of review that would look at whether a project was intended or otherwise likely to take existing business away from another Florida port. The last criteria is related to capacity which would evaluate whether a project would create substantial overcapacity of port facilities within a region and thus be less appropriate to fund using FSTED program funds.

Finally, the Committee discussed the policy that would allow individual seaports to determine which of their eligible projects would receive priority for funding each year. Regardless of any individual project scoring, the port would determine which project they have identified for funding each fiscal year. The ports would discuss their priorities with FDOT and the FDEO and determine which specific projects they were seeking to fund. The appropriate evaluation tools could then be applied to that project.

Under this recommended process, the FSTED, FDOT and FDEO staff would sit down to review eligible projects and develop the initial recommendation of allocations several weeks in advance of the FSTED Council meeting. Ports with questions on the proposed allocations could then submit letters to the FSTED Council Chairman that could be

reviewed during the meeting. Thus, the FSTED Council members would know prior to the meeting the proposed allocations and any potential amendments sought by member ports.

The Committee had some discussion with FDOT concerning the participation of the FSTED Council in port allocations outside of the 311 program. FDOT representatives stated that there was a commitment to developing a process that obtains full input from the collective wisdom of the port directors.

Chairman Wainio asked FDOT Chief of Staff Francis Gibbs if he wanted to make any comments on the Committee meetings. Mr. Gibbs thanked Mr. Stubbs for his leadership of the Committee, and noted that a lot common ground to improve the allocation process was identified. Mr. Gibbs stated that FDOT was working on legislation to address the specific issues brought up during the Committee meetings. The changes recommended by the Committee will make the FSTED program a lot stronger. Mr. Gibbs informed the members that FDOT was discussing the concept of a separate pot of resources for what would be called "strategic port investments." This separate pot would be for projects that impact the state's ultimate economic growth, and the ports would be part of the project selection and allocation process. Mr. Gibbs stated that the Legislature will ultimately draft the legislation, but FDOT supports a lot of the Committee's recommendations and goals. Some of these recommendations can be included in the legislation and some are better suited for internal processes or rules.

Council members discussed the Committee recommendations and a few of the members expressed concerns over developing written guideline statements concerning equitable distribution of funds and additional consideration for small port projects. Mr. Stubbs stated that the Committee struggled with the issue of placing these guidelines in writing and noted that the recommendations were just guidelines to be used by the FSTED Council as a compass for institutional policy. Projects would still have to meet basic criteria and be scored by the FDOT, FDEO and the seaports before receiving any funding. Members also stated the need to work with FDOT to develop a scoring analysis that was responsive to seaport projects.

A motion was made, seconded and approved to accept the recommendations of the Committee for consideration at a future meeting. FSTED Council staff was directed to work with Council members on any refinement of the guideline and criteria language. Mr. Wheeler informed the members that staff would circulate the written guidelines and criteria for additional input and potential modifications as soon as possible.

Agenda Item 6, Agency Reports was taken up. Mr. Gibbs, reporting for the Department of Transportation, provided the members with information on Secretary Prasad's announcement concerning the Governor's Transportation Vision Plan for the 21st Century. Freight is a significant part of this Vision and the FDOT will be creating an office of freight mobility and logistics within the Department. Ms. Dahlrose provided the members with a revenue forecast for the State Transportation Trust Fund, and stated that the revenues numbers were still tracking low. Ms. Dahlrose also provided the members with the current status of FDOT's budget request for seaports in Fiscal Year 2012/2013, providing a total of approximately \$87 million at this time. Ms. Dahlrose informed the members that FDOT was refining its seaport project review process and had used the framework to review this year's projects. All of those projects ranked either medium or high using the new process. Mr. Wheeler thanked Mr. Gibbs and Ms. Dahlrose for their cooperation and hard work over the past few months, and noted that FDOT recently asked staff to sit down with them and go line by line over potential legislation. He said the ports appreciated the efforts of FDOT to improve their relationship and work together on these issues.

Ms. Coven provided the report for the Department of Community Affairs. She directed the members to the materials in their notebooks on current comprehensive planning activities impacting Florida seaports. Ms. Coven also discussed the impact of the legislation consolidating DCA functions into the Department of Economic Opportunity. DCA planning staff will be moving over into DEO and will still be reviewing seaport applications for compliance with comprehensive plans. Ms. Coven directed the members to information in their materials concerning other changes made to state growth management planning requirements. Ms. Coven stated that DCA staff was working with the

DEO to help develop the business plan required by the Florida Legislature. Ms. Leikauf noted that Florida Ports Council staff had been invited to participate in the business plan development and were providing the DEO with strategic information on port development.

Ms. Morrison provided the report for the Department of Economic Opportunity (formerly Office of Tourism, Trade and Economic Development). Ms. Morrison stated that the DEO was in the middle of the substantial reorganization directed by the Florida Legislature and would be working closely with Secretary Gray Swoope and Enterprise Florida on the reorganization. Seaports should not see any change in the review of seaport projects relative to economic impacts.

Agenda Item 7, Review of Seaport Funding Spend Downs was taken up. Ms. Keller provided the report on spend downs and directed the members to the charts in their materials. The current level of spend down by the seaports was progressing very well and there were no major issues.

Mr. Phil Allen provided the members with a request from Port Everglades to reallocate FSTED program funds from one project to another project. The Port had saved money on a bulkhead project, and had additional needs on a cruise terminal project because of requests from the U.S. Customs and Border Protection Agency. Port Everglades was seeking approval to reallocate savings from the Berth 33 project to this cruise terminal project. A motion was made, seconded and approved to authorize the reallocation of FSTED program funds as requested.

Agenda Item 8, Agency Reports on Consistency Reviews of FY 12/13 Project Applications. Ms. Coven, Ms. Dahlrose and Ms. Morrison all stated that DCA, FDOT, and DEO had reviewed all 50 projects and found them consistent with Chapter 311 project requirements. Ms. Keller informed the members that approved and unaltered project applications which were unfunded in prior years had been rolled forward for consideration under the new SeaCIP system for eligibility this year. However, because of a minor glitch, the wharf project at the Port of Palm Beach had not been included in that roll forward and should be added to the list of projects eligible for funding. Mr. Almira informed the members that the project had been previously approved as consistent and eligible for funding. A motion was made, seconded and approved to accept the consistency approval of the agencies and determine those projects (including the Port of Palm Beach wharf project) as eligible for funding.

Ms. Leikauf directed the members to information on two Port Manatee projects included in their materials. These two projects had been submitted previously by Port Manatee, but did not fit into the new roll forward process and had not been resubmitted as required. All three state agencies had previously reviewed these projects and found them consistent and eligible for funding. A motion was necessary to approve these consistent projects as eligible for funding in the current process. A motion was made, seconded and approved to accept these projects as consistent and eligible for funding.

Ms. Keller directed the members to information on the feasibility study for Port Citrus. Staff's recommendation was for Port Citrus to use the SeaCIP process for their funding request for the feasibility study. Mr. Allen asked about the parameters of the feasibility study. Mr. Thorpe informed the members that Port Citrus anticipated that the study would address many issues concerning the economics, market, the landscape, and the infrastructure required. It was the intent of Port Citrus to seek input from FDOT and the FSTED Council before issuing the RFP for the study. The members suggested that the Chair of the Council review the study on behalf of the Council and provide Port Citrus with input.

Agenda Item 9, Allocation of FSTED Program Funds was taken up. Mr. Wheeler directed the members to the spreadsheets in their materials. The information provided a breakdown of all the projects requested, last year's approved allocations, and the three available sources of funds for this year's proposed allocations – Chapter 311 funds, FPFC bond refinance savings for FY 2011/12, and FFPC bond refinance savings for FY 2012/13. Staff has conducted several discussions with port directors and agency personnel on the specifics of individual projects and master plans. Staff also sat down with FDOT staff for their review and input. Mr. Wheeler indicated that the allocation

recommendation process was very comprehensive and thorough.

Mr. Allen questioned some larger projects that were only receiving partial funding, and whether those projects could move forward without full funding. JaxPort and Port Manatee stated that their allocations allowed for them to move forward with a significant part of those projects and would not impair their ability to ultimately complete such projects. Mr. Allen also asked if Palm Beach had the match necessary to proceed with its slip three project. Mr. Almira stated that the port had the funds and was ready to proceed.

Chair Wainio asked about a potential transfer of FY 12/13 allocation of funds from Tampa to JaxPort. Mr. Wheeler stated that allocation was actually a swap of Chapter 311 funds in FY 2012/13 by JaxPort in return for FPFC bond refinance savings monies in FY 2011/12 from Tampa. Mr. Kancharla stated that the project costs and schedules make this swap beneficial for both seaports. A motion was made, seconded and approved to amend the recommended allocations to include this transfer.

Mr. Mathis informed the members that Pensacola was trying to make up a short-fall of approximately \$600,000 for one if its projects in Fiscal Year 2012/13. Members discussed the issue, and a recommendation was made for the six seaports receiving more than \$2 million in their allocations to redirect \$100,000 each to assist Pensacola. A motion was made, seconded and approved to reallocate \$100,000 from those six seaports receiving more than \$2 million to the Port of Pensacola in Fiscal Year 2012/13, and take this reallocation into consideration when allocating the FPFC bond refinance savings monies in FY 2013/14. A motion was made, seconded and approved to amend the recommended allocations to include this transfer.

A motion was made, seconded and approved to accept the recommended allocation of funds presented by staff as amended by the Council above..

Ms. Leikauf directed the members to the FPFC bond refinancing documents in their materials, and told them they were provided to them for information. She said the FDOT staff was very helpful in finalizing these documents. Mr. Allen asked when seaports could enter into a JPA with FDOT on FY 2011/12 FPFC bond refinance monies. Ms. Dahlrose stated that FDOT was working on a budget authority and necessary amendments through the Legislative Budget Commission, and that she would get back to the individual seaports on a case-by-case basis.

Agenda Item 10, Other Issues was taken up. Mr. Allen informed the members that the Florida Ports Council needed to appoint a new person to serve on the Florida Ocean Alliance, and that he had asked Mr. Almira to serve in that position. Mr. Allen also informed the members that he had asked Mr. Anderson to serve as state legislative co-chair with Stan Payne for the Florida Ports Council.

The meeting was adjourned at 3:45 p.m.

MEETING SUMMARY

FLORIDA SEAPORT TRANSPORTATION AND ECONOMIC DEVELOPMENT COUNCIL

October 21, 2011

Teleconference Meeting (Tallahassee, Florida)

A teleconference meeting of the Florida Seaport Transportation and Economic Development (FSTED) Council was held on October 21, 2011. Chairman Richard Wainio called the meeting to order. The Assistant Secretary called the roll. Members present were:

Pat Poston for Stan Payne, Canaveral Brad Thorpe, Citrus County Glenn Wiltshire for Phil Allen, Everglades Don West for Faye Outlaw, Ft. Pierce Paul Anderson, Jacksonville Jim Fitton, Key West Bill Johnson, Miami Manny Almira, Palm Beach Clyde Mathis, Pensacola Tommy Pitts, Port St. Joe Richard Wainio, Tampa.

Francis Gibbs for Secretary Ananth Prasad, Florida Department of Transportation Katherine Morrison for Director Doug Darling, Florida Department of Economic Opportunity

A quorum was present. Also in attendance were:

Richard Wesch, Citrus County
David Kaufman, Jacksonville
Gary Maidhof, Citrus County
Ram Kancharla, Tampa
Doug Wheeler, FPC
Michael Brillhart, Ft. Pierce
Amy Miller, Pensacola
Michael Poole, Jacksonville
Michael Rubin, FPC

Toy Keller, FPC

Agenda Item 3, Proposed Revision to Allocation of FSTED Program FY 2011/12 and 2012/13 Funds – Swap of Fiscal Year funding between Port Citrus and Port of Tampa was taken up. Ms. Keller directed the members to the chart of approved allocations in their materials. Mr. Wheeler informed the members that Port Citrus had received an allocation of funding for FY 2012/13, but would need their allocation in FY 2011/12 to begin work on their feasibility study. Chair Wainio stated that Tampa had offered to swap \$50,000 from its FY 2011/12 allocation with Port Citrus who would then return for this allocation of \$50,000 to Tampa in FY 2012/13. A motion was made, seconded and approved on this allocation swap.

Agenda item 4, Discussion of Excess Funds was taken up. Mr. Wheeler directed the members to the memorandum in their materials. Based on the savings analysis conducted by FDOT's Comptroller, an additional \$24,656 can be allocated to seaport projects in the future. A motion was made, seconded and approved to allocate those funds during the next FSTED program allocation cycle.

The meeting was adjourned at 10:30 a.m.

TAB 4 LEGISLATIVE REPORT ON 2012 REGULAR SESSION

Canaveral Port Authority · Port Citrus · Port Everglades · Port of Fernandina · Port of Fort Pierce · Jacksonville Port Authority · Port of Key West · Manatee Port Authority · Port Miami · Port of Palm Beach · Panama City Port Authority · Port of Pensacola · Port St. Joe Port Authority · Port of St. Petersburg · Tampa Port Authority

MEMORANDUM

DATE: March 13, 2012

TO: Florida Port Directors

FROM: Michael Rubin, Vice President Governmental Affairs

SUBJECT: LEGISLATIVE UPDATE – END OF 2012 SESSION REPORT

The Florida Legislature completed a difficult Regular Session that included arguments over gaming, redrawing of legislative district maps, insurance, and a reduction in funding for such issues as higher education. During these difficult times, Florida seaports are seen as a center piece of economic development by this Legislature and the Governor. We are pleased to note that legislative discussions on transportation and economic development began with a discussion on investing in Florida's seaports. This theme continued in the budget and transportation legislation, and as one Senate staff member noted: "Florida seaports have done well this Session." We provide the following report on legislation that passed and did not pass during Regular Session 2012:

Legislation Passed By The Florida Legislature

- 1. <u>Fiscal Year 2012/2013 Budget (HB 5001)</u>: The General Appropriations Act for Fiscal Year 2012/13 contained a variety of provisions for Florida seaports, and continues to represent an appropriation of more than \$100 million for seaport projects around the state. Specific line items in the budget containing seaport appropriations include:
 - a. Line Item 1920, 1996 FPFC Bond Program Debt Service Payment \$15 million.
 - b. Line Item 1921, 1999 FPFC Bond Program Debt Service Payment \$10 million.
 - c. Line Item 1922, Seaport Grants (Chapter 311 FSTED Program and Seaport-related Funds) \$115,446,664.

Line Item 1922 also contains proviso language that authorizes "up to \$5,000,000 shall be used for port projects involving bulkhead repairs for those ports located in counties designated as Rural Areas of Critical Economic Concern (RACEC) and are eligible for funding as provided in section 311.07(3)(a), Florida Statutes." Section 35 of the Appropriations Implementing Bill (HB 5003) authorizes such projects to be "eligible for waiver of match requirements."

- d. Line Item 1924, Intermodal Development/Grants \$91,013,006. (Based on initial discussions with FDOT, \$46,871.343 of the appropriation in this line item are designated for seaport projects).
- e. Line Item 1968, Economic Development "Road Funds" \$30 million. \$2 million was included as a line item project for "Infrastructure Improvement Port of Pensacola."
- 2. Transportation Appropriations Conforming Bill (SB 1998): The Legislature passed SB 1998 to conform statutory language to appropriations passed in the General Appropriations Act. This legislation included a redirect of the increased motor vehicle license fees passed a few years ago, and included specific language relating to seaports. The seaport funding allocations passed in this bill provide a pledge of an additional \$52 million for seaports annually. Specific issues include the following:
 - a. Increases the minimum statutory amount of funding for the FSTED program from \$8 million to \$15 million.
 - b. Creates a new Strategic Port Investment Initiative program with a minimum funding amount of \$35 million for projects that "meet the state's economic development goal of becoming a hub for trade, logistics, and export-oriented activities..." FDOT is required to work with all Florida public seaports (those specifically listed in s. 311.09, F.S.) to "develop and maintain a priority list of strategic investment projects."
 - c. Creates a new Intermodal Logistics Center Infrastructure Support Program with up to \$5 million annually allocated to the program. The purpose of this program is "to provide funds for roads, rail facilities, or other means for the conveyance or shipment of goods through a seaport,..." FDOT is only authorized to provide up to 50 percent of the costs of projects under this program.
 - d. Authorizes a new bondable revenue stream of \$10 million, beginning July 1, 2013, for seaport projects in the FDOT "adopted work program" to be known as the "Seaport Investment Program." The Division of Bond Finance would be responsible for bonding these revenues. The funds generated from this new bondable stream will pay for projects already identified for funding in the Work Program and help "free up" additional funds that could then be used for other projects including additional seaport projects.
 - e. Redirects approximately \$200 million of motor vehicle licensing revenues, previously allocated to the General Revenue Fund, back to the State Transportation Trust Fund. In addition to the allocation of \$10 million to the Seaport Investment Program mentioned above, these funds are allocated as follows:

- i. \$35 million, beginning in Fiscal Year 2013/14, to Florida's Turnpike Enterprise system.
- ii. \$10 million, beginning in Fiscal Year 2013/14, to the Transportation Disadvantaged Program.
- iii. \$10 million, beginning in Fiscal Year 2013/14, to the Small County Outreach Program (SCOP).
- iv. Any remaining funds after these allocations are required to be used annually for "existing or planned strategic transportation projects which connect major markets within this state or between this state and other states, which focus on job creation, and which increase this state's viability in the national and global markets.
- f. Requires FDOT to conduct a "transportation debt assessment" on debt and debt-like contractual obligations. This assessment would include financing issued on behalf of the Florida Ports Financing Commission, State Infrastructure Bank loans, and a variety of other FDOT contractual obligations. FDOT is required to manage all levels of debt "to ensure that by the beginning of the 2017-2018 fiscal year, not more than 20 percent of total projected available state and federal revenues from the State Transportation Trust Funds, together with any local funds committed to FDOT projects are committed to the obligations." After that time, FDOT must seek the approval of the Governor and Legislature to exceed such debt limit.
- g. Transfers administration of the state's economic development transportation projects program ("Road Fund") to FDOT from the Department of Economic Opportunity (DEO). Requires FDOT to consult with the DEO on project selection to identify projects that are "necessary to facilitate the economic development and growth of the state."
- h. Authorizes the designation in the state's Strategic Intermodal System (SIS) program of an "intermodal logistics center." The term "intermodal logistics center" is defined as a facility or group of facilities "serving as a point of intermodal transfer of freight in a specific area physically separated from a seaport whose activities relating to transport, logistics, goods distribution, consolidation, or value-added activities are carried out and whose activities and services are designed to support or be supported by one or more seaports, as provided in s. 311.09, F.S., or an airport whose activities and services are designed to support the transport, logistics, goods distribution, consolidation, or value added activities related to airborne cargo deems necessary to facilitate the economic development and growth of the state."
- i. Authorizes a "intermodal logistics center" defined above to be exempt from transportation concurrency requirements if the center is located in a Rural Area of Critical Economic Concern, a rural enterprise zone, or within 15 miles of the boundaries of such areas.
- j. Creates an expedited administrative hearing process for any "challenge to a consolidated environmental resource permit or an associated variance or a sovereign

submerged lands authorization proposed or issued by the Department of Environmental Protection (DEP) in connection with the state's deepwater ports. Such challenges would be conducted pursuant to section 120.574, F.S., and must be conducted "within 30 days after a party files a motion for a summary hearing, regardless of whether the parties agree to the summary proceeding, and the administrative law judge's decision shall be in the form of a recommended order and does not constitute final agency action of the department."

- 3. 2012 Transportation Legislation (CS/CS/CSHB 599 by Representative Pilon): Because of disagreements over HB 1399 and SB 1866, the Legislature amended CS/CS/CS/HB 599 on the last day of Regular Session 2012 to include agreed upon provisions of transportation legislation contained in those bills. This amendment included all of the provisions in SB 1998 discussed above except for the funding redirect allocation provisions (this was a pure appropriations provision that was only included in that appropriations conforming bill). The 188-page bill also contains various transportation issues on tolling, certain expressway authorities, and other FDOT legislative priorities. In addition to passing the transportation language contained in SB 1998 again, the bill also included the following seaport issues:
 - a. Creates section 311.106, F.S., concerning seaport stormwater permitting and mitigation. This section would authorize seaports to provide for onsite or offsite stormwater treatment for water quality impacts caused by proposed port activity that requires a permit, and that causes or contributes to pollutions from stormwater runoff.
 - b. Amends section 373.4136, F.S., concerning the establishment and operation of mitigation banks. Authorizes seaports to use a mitigation bank on projects that have met additional criteria for projects in surface waters and wetlands contained in section 373.414, F.S.
 - c. Requires the FDOT, in coordination with seaports and other partners, to develop a "Statewide Seaport and Waterways System Plan."
 - d. Requires the FDOT, in coordination with its partners and stakeholders, to develop a "Freight Mobility and Trade Plan." The plan is required to be delivered to the Governor and Legislature by July 1, 2013, and "shall include, but need not be limited to, proposed policies and investments that promote the following:"
 - i. Increasing the flow of domestic and international trade through the state's seaports and airports, including specific policies and investments that will recapture cargo currently shipped through seaports and airports located outside the state.
 - ii. Increasing the development of intermodal logistic centers in the state, including specific strategies, policies, and investment that capitalize on the empty backhaul trucking and rail market in the state.
 - iii. Increasing the development of manufacturing industries in the state, including specific policies and investments in transportation facilities that

- will promote the successful development and expansion of manufacturing facilities.
- iv. Increasing the implementation of compressed natural gas (CNG), liquefied natural gas (LNG), and propane energy policies that reduce transportation costs for businesses and residents located in the state.
- e. Requires FDOT to give "emphasis in all appropriate transportation plans, including the Florida Transportation Plan and the Strategic Intermodal System Plan" on freight issues and needs.
- f. Requires FDOT to plan and develop "Strategic Intermodal System Highway Corridors" that allow for high-speed and high-volume traffic movements within the state. The FDOT must ensure that access is "limited or controlled" to these corridors. For the purposes of developing these corridors, "beginning in fiscal year 2012-2013 and for each fiscal year thereafter, the minimum amount allocated shall be based on the fiscal year 2003-2004 allocation of \$450 million adjusted annually by the change in the Consumer Price Index for the prior fiscal year compared to the Consumer Price Index for fiscal year 2003-2004." Projects identified under this provision can be existing projects previously identified in FDOT's Work Program or new projects identified by FDOT.
- g. Amends various statutes relating to Metropolitan Planning Organizations (MPOs). This includes: requiring, to the extent possible, only one MPO to be designated for each urbanized area or group of contiguous urbanizes areas; making FDOT representative on MPOs "non-voting advisers"; and providing that where more than one MPO exists in an urbanized area, the MPOs are to coordinate in developing regionally significant project priorities.
- h. Authorizes ferries, such as the Mayport Ferry (currently operated by the Jacksonville Port Authority), to be operated by "joint agreement between public and private entities."
- 4. Economic Development Legislation (HB 7087 by the House Committee on Finance and Tax): The Legislature passed economic development legislation expanding a variety of existing tax incentives for businesses, to include the following incentives:
 - a. Increases the current corporate income tax exemption from net income from \$25,000 to \$50,000.
 - b. Decreases the productive output required to qualify for the sales tax exemption for industrial machinery and equipment used by an expanding business from 10 percent to 5 percent.
 - c. Increases the total amount of tax credits available to be allocated under Enterprise Florida's "New Markets Development Program" from \$97.5 million to \$195 million.

- 5. Environmental Regulation Legislation (CS/CS/CS/CS/HB 503 by Representative Patronis): The Legislature passed environmental regulation and permitting legislation that created or amended a variety of state environmental regulations, to include providing expedited permitting for any inland multimodal facility receiving or sending cargo through a Florida seaport.
- 6. Rules Establishing Numeric Nutrient Criteria Legislation (HB 7051 by the House Agriculture and Natural Resource Subcommittee): The Legislature passed legislation specifically adopting proposed rules by the DEP on numeric nutrient criteria (See, DEP rule 62-302.531(9), F.A.C.) and exempted these rules from legislative ratification requirements contained in Chapter 120, Florida Statutes. The Governor signed this bill into law on February 16, 2012. Various environmental groups have filed a challenge to the adopted DEP rule with Florida Division of Administrative Hearings. The Administrative Hearing on the challenge began on February 27, 2012, and no ruling has been made to date.

<u>Legislation NOT passed by the Florida Legislature</u>

- 1. Freight Mobility Development (Incentive) Legislation (HB 679 by Representative Ray and CS/CS/SB 1168 by Senator Ring): Although the Legislature did pass a tax incentive package late in the Session, there was no desire to enact "new tax incentives." This bill along with a myriad of other tax incentive bills did not pass.
- 2. Transportation Accessibility Legislation (HB 1201 by Representative Nunez and CS/SB 1392 by Senator Benacquisto): Senate leadership stated that Senate staff could be directed to conduct a study of handicapped accessible taxicabs, and no substantive legislation was necessary. We expect that the Senate will identify this issue as an "interim study" for completion and delivery during Regular Session 2013.
- 3. Employee Compensation Legislation (HB 545 by Representative Mayfield and SB 596 by Senator Storms): HB 545 was never heard in committee, and SB 596 was only heard in one Senate committee. Language relating to employees of seaport authorities was never raised in any other House or Senate committee. In addition, language pertaining to limitations on salaries of employees at the Orlando-Orange County Expressway Authority was removed from the final version of SB 1998.
- 4. Worker's Compensation Legislation (CS/HB 511 by Representative Hudson and SB 669 by Senator Hays): The Legislature failed to pass legislation revising the state's worker's compensation laws. The bill would have provided a variety of changes, including a 2.5 percent reduction in rates for all employers and revision to prescription drug reimbursement rates. These revisions were expected to result in a \$62 million costs savings around the state.

5. <u>Verification of Employment Eligibility (e-Verify) Legislation (HB 1313 by Representative Harrell and SB 1638 by Senator Altman)</u>: Neither of these bills were heard in either a House or Senate Committee. This legislation would have required every employer in Florida to use the Employment Authorization Program (e-Verify) to check a person's immigration status.

Section 3. Chapter 311, Florida Statutes, is retitled "SEAPORT PROGRAMS AND FACILITIES."

Section 4. Section 311.07, Florida Statutes, is amended to read:

311.07 Florida seaport transportation and economic development funding.—

- (1) There is created the Florida Seaport Transportation and Economic Development Program within the Department of Transportation to finance port transportation or port facilities projects that will improve the movement and intermodal transportation of cargo or passengers in commerce and trade and that will support the interests, purposes, and requirements of the ports listed in s. 311.09 located in this state.
- (2) A minimum of \$15 \$8 million per year shall be made available from the State Transportation Trust Fund to fund the Florida Seaport Transportation and Economic Development Program. The Florida Seaport Transportation and Economic Development Council created in s. 311.09 shall develop guidelines for project funding. Council staff, the Department of Transportation, and the Department of Economic Opportunity shall work in cooperation to review projects and allocate funds in accordance with the schedule required for the Department of Transportation to include these projects in the tentative work program developed pursuant to s. 339.135(4).

- (3) (a) Florida Seaport Transportation and Economic Development Program funds shall be used to fund approved projects on a 50-50 matching basis with any of the deepwater ports, as listed in s. $311.09 \, \text{s.} \, 403.021(9)(b)$, which is governed by a public body or any other deepwater port which is governed by a public body and which complies with the water quality provisions of s. 403.061, the comprehensive master plan requirements of s. 163.3178(2)(k), and the local financial management and reporting provisions of part III of chapter 218. However, program funds used to fund projects that involve the rehabilitation of wharves, docks, berths, bulkheads, or similar structures shall require a 25-percent match of funds. Program funds also may be used by the Seaport Transportation and Economic Development Council for data and analysis that to develop trade data information products which will assist Florida's seaports and international trade.
- (b) Projects eligible for funding by grants under the program are limited to the following port facilities or port transportation projects:
- 1. Transportation facilities within the jurisdiction of the port.
- 2. The dredging or deepening of channels, turning basins, or harbors.
- 3. The construction or rehabilitation of wharves, docks, structures, jetties, piers, storage facilities, cruise terminals, automated people mover systems, or any facilities necessary or useful in connection with any of the foregoing.
- 4. The acquisition of vessel tracking systems, container cranes, or other mechanized equipment used in the movement of

20121998e2

cargo or passengers in international commerce.

- 5. The acquisition of land to be used for port purposes.
- 6. The acquisition, improvement, enlargement, or extension of existing port facilities.
- 7. Environmental protection projects which are necessary because of requirements imposed by a state agency as a condition of a permit or other form of state approval; which are necessary for environmental mitigation required as a condition of a state, federal, or local environmental permit; which are necessary for the acquisition of spoil disposal sites and improvements to existing and future spoil sites; or which result from the funding of eligible projects listed in this paragraph.
- 8. Transportation facilities as defined in s. 334.03(31) which are not otherwise part of the Department of Transportation's adopted work program.
- 9. Seaport Intermodal access projects identified in the 5year Florida Seaport Mission Plan as provided in s. 311.09(3).
- 10. Construction or rehabilitation of port facilities as defined in s. 315.02, excluding any park or recreational facilities, in ports listed in s. 311.09(1) with operating revenues of \$5 million or less, provided that such projects create economic development opportunities, capital improvements, and positive financial returns to such ports.
- 11. Seaport master plan or strategic plan development or updates, including the purchase of data to support such plans.
- (c) To be eligible for consideration by the council pursuant to this section, a project must be consistent with the port comprehensive master plan which is incorporated as part of the approved local government comprehensive plan as required by

20121998e2

s. 163.3178(2)(k) or other provisions of the Community Planning Act, part II of chapter 163.

- (4) A port eligible for matching funds under the program may receive a distribution of not more than \$7 million during any 1 calendar year and a distribution of not more than \$30 million during any 5-calendar-year period.
- (4)(5) Any port which receives funding under the program shall institute procedures to ensure that jobs created as a result of the state funding shall be subject to equal opportunity hiring practices in the manner provided in s. 110.112.
- (5)(6) The Department of Transportation may shall subject any project that receives funds pursuant to this section and s. 320.20 to a final audit. The department may adopt rules and perform such other acts as are necessary or convenient to ensure that the final audits are conducted and that any deficiency or questioned costs noted by the audit are resolved.
- Section 5. Subsections (4) through (13) of section 311.09, Florida Statutes, are amended to read:
- 311.09 Florida Seaport Transportation and Economic Development Council.—
- (4) The council shall adopt rules for evaluating projects which may be funded under ss. 311.07 and 320.20. The rules shall provide criteria for evaluating the potential project, including, but not limited to, such factors as consistency with appropriate plans, economic benefit, readiness for construction, noncompetition with other Florida ports, and capacity within the seaport system economic benefit of the project, measured by the potential for the proposed project to maintain or increase cargo

20121998e2

flow, cruise passenger movement, international commerce, port revenues, and the number of jobs for the port's local community.

- (5) The council shall review and approve or disapprove each project eligible to be funded pursuant to the Florida Seaport Transportation and Economic Development Program. The council shall annually submit to the Secretary of Transportation and the executive director of the Department of Economic Opportunity, or his or her designee, a list of projects which have been approved by the council. The list shall specify the recommended funding level for each project; and, if staged implementation of the project is appropriate, the funding requirements for each stage shall be specified.
- (6) The Department of Community Affairs shall review the list of projects approved by the council to determine consistency with approved local government comprehensive plans of the units of local government in which the port is located and consistency with the port master plan. The Department of Community Affairs shall identify and notify the council of those projects which are not consistent, to the maximum extent feasible, with such comprehensive plans and port master plans.
- (6) (7) The Department of Transportation shall review the list of project applications projects approved by the council for consistency with the Florida Transportation Plan, the Statewide Seaport and Waterways System Plan, and the department's adopted work program. In evaluating the consistency of a project, the department shall assess the transportation impacts and economic benefits for each project determine whether the transportation impact of the proposed project is adequately handled by existing state-owned transportation facilities or by

the construction of additional state-owned transportation facilities as identified in the Florida Transportation Plan and the department's adopted work program. In reviewing for consistency a transportation facility project as defined in s. 334.03(31) which is not otherwise part of the department's work program, the department shall evaluate whether the project is needed to provide for projected movement of cargo or passengers from the port to a state transportation facility or local road. If the project is needed to provide for projected movement of cargo or passengers, the project shall be approved for consistency as a consideration to facilitate the economic development and growth of the state in a timely manner. The Department of Transportation shall identify those projects that which are inconsistent with the Florida Transportation Plan, the Statewide Seaport and Waterways System Plan, or and the adopted work program and shall notify the council of projects found to be inconsistent.

(7) (8) The Department of Economic Opportunity shall review the list of project applications projects approved by the council to evaluate the economic benefit of the project and to determine whether the project is consistent with the Florida Seaport Mission Plan and with state economic development goals and policies. The Department of Economic Opportunity shall review the proposed project's consistency with state, regional, and local plans, as appropriate, and the economic benefits of each project based upon the rules adopted pursuant to subsection (4). The Department of Economic Opportunity shall identify those projects that which it has determined do not offer an economic benefit to the state, are not consistent with an appropriate

plan, or are not consistent with the Florida Seaport Mission
Plan or state economic development goals and policies and shall notify the council of its findings.

(8) (9) The council shall review the findings of the Department of Economic Opportunity and the Department of Transportation. Projects found to be inconsistent pursuant to subsections $(6)_{\tau}$ or $(7)_{\tau}$ and (8) or and projects that which have been determined not to offer an economic benefit to the state pursuant to subsection (7) (8) may shall not be included in the list of projects to be funded.

(9) (10) The Department of Transportation shall include no less than \$15 million per year in its annual legislative budget request for the a Florida Seaport Transportation and Economic Development grant Program funded under s. 311.07 for expenditure of funds of not less than \$8 million per year. Such budget shall include funding for projects approved by the council which have been determined by each agency to be consistent and which have been determined by the Department of Economic Opportunity to be economically beneficial. The department shall include the specific approved Florida Seaport Transportation and Economic Development Program seaport projects to be funded under s. 311.07 this section during the ensuing fiscal year in the tentative work program developed pursuant to s. 339.135(4). The total amount of funding to be allocated to Florida Seaport Transportation and Economic Development Program seaport projects under s. 311.07 during the successive 4 fiscal years shall also be included in the tentative work program developed pursuant to s. 339.135(4). The council may submit to the department a list of approved projects that could be made production-ready within

the next 2 years. The list shall be submitted by the department as part of the needs and project list prepared pursuant to s. 339.135(2)(b). However, the department shall, upon written request of the Florida Seaport Transportation and Economic Development Council, submit work program amendments pursuant to s. 339.135(7) to the Governor within 10 days after the later of the date the request is received by the department or the effective date of the amendment, termination, or closure of the applicable funding agreement between the department and the affected seaport, as required to release the funds from the existing commitment. Notwithstanding s. 339.135(7)(c), any work program amendment to transfer prior year funds from one approved seaport project to another seaport project is subject to the procedures in s. 339.135(7)(d). Notwithstanding any provision of law to the contrary, the department may transfer unexpended budget between the seaport projects as identified in the approved work program amendments.

(10)(11) The council shall meet at the call of its chairperson, at the request of a majority of its membership, or at such times as may be prescribed in its bylaws. However, the council must meet at least semiannually. A majority of voting members of the council constitutes a quorum for the purpose of transacting the business of the council. All members of the council are voting members. A vote of the majority of the voting members present is sufficient for any action of the council, except that a member representing the Department of Transportation or the Department of Economic Opportunity may vote to overrule any action of the council approving a project pursuant to subsection (5). The bylaws of the council may

require a greater vote for a particular action.

(11) (12) Members of the council shall serve without compensation but are entitled to receive reimbursement for per diem and travel expenses as provided in s. 112.061. The council may elect to provide an administrative staff to provide services to the council on matters relating to the Florida Seaport Transportation and Economic Development Program and the council. The cost for such administrative services shall be paid by all ports that receive funding from the Florida Seaport Transportation and Economic Development Program, based upon a pro rata formula measured by each recipient's share of the funds as compared to the total funds disbursed to all recipients during the year. The share of costs for administrative services shall be paid in its total amount by the recipient port upon execution by the port and the Department of Transportation of a joint participation agreement for each council-approved project, and such payment is in addition to the matching funds required to be paid by the recipient port. Except as otherwise exempted by law, all moneys derived from the Florida Seaport Transportation and Economic Development Program shall be expended in accordance with the provisions of s. 287.057. Seaports subject to competitive negotiation requirements of a local governing body shall abide by the provisions of s. 287.055.

(12) (13) Until July 1, 2014, Citrus County may apply for a grant through the Florida Seaport Transportation and Economic Development Council to perform a feasibility study regarding the establishment of a port in Citrus County. The council shall evaluate such application pursuant to subsections (5)-(8)

20121998e2

(9) and, if approved, the Department of Transportation shall include the feasibility study in its budget request pursuant to subsection (9) (10). If the study determines that a port in Citrus County is not feasible, the membership of Port Citrus on the council shall terminate.

Section 6. Section 311.10, Florida Statutes, is created to read:

311.10 Strategic Port Investment Initiative.-

- (1) There is created the Strategic Port Investment
 Initiative within the Department of Transportation. Beginning in
 fiscal year 2012-2013, a minimum of \$35 million annually shall
 be made available from the State Transportation Trust Fund to
 fund the Strategic Port Investment Initiative. The Department of
 Transportation shall work with the deepwater ports listed in s.
 311.09 to develop and maintain a priority list of strategic
 investment projects. Project selection shall be based on
 projects that meet the state's economic development goal of
 becoming a hub for trade, logistics, and export-oriented
 activities by:
- (a) Providing important access and major on-port capacity
 improvements;
- (b) Providing capital improvements to strategically position the state to maximize opportunities in international trade, logistics, or the cruise industry;
- (c) Achieving state goals of an integrated intermodal transportation system; and
- (d) Demonstrating the feasibility and availability of matching funds through local or private partners.
 - (2) Before making final project allocations, the Department

20121998e2

of Transportation shall schedule a publicly noticed workshop with the Department of Economic Opportunity and the deepwater ports listed in s. 311.09 to review the proposed projects. After considering the comments received, the Department of Transportation shall finalize a prioritized list of potential projects.

(3) The Department of Transportation shall, to the maximum extent feasible, include the seaport projects proposed to be funded under this section in the tentative work program developed under s. 339.135(4).

Section 7. Section 311.101, Florida Statutes, is created to read:

311.101 Intermodal Logistics Center Infrastructure Support Program.—

(1) There is created within the Department of
Transportation the Intermodal Logistics Center Infrastructure
Support Program. The purpose of the program is to provide funds
for roads, rail facilities, or other means for the conveyance or
shipment of goods through a seaport, thereby enabling the state
to respond to private sector market demands and meet the state's
economic development goal of becoming a hub for trade,
logistics, and export-oriented activities. The department may
provide funds to assist with local government projects or
projects performed by private entities which meet the public
purpose of enhancing transportation facilities for the
conveyance or shipment of goods through a seaport to or from an
intermodal logistics center.

(2) As used in this section, the term "intermodal logistics center" means a facility or group of facilities, including, but

20121998e2

not limited to, an inland port, serving as a point of intermodal transfer of freight in a specific area physically separated from a seaport where activities relating to transport, logistics, goods distribution, consolidation, or value-added activities are carried out and whose activities and services are designed to support or be supported by conveyance or shipping through one or more seaports listed in s. 311.09.

- (3) The department must consider, but is not limited to, the following criteria when evaluating a project for Intermodal Logistics Center Infrastructure Support Program assistance:
- (a) The ability of the project to serve a strategic state interest.
- (b) The ability of the project to facilitate the cost-effective and efficient movement of goods.
- (c) The extent to which the project contributes to economic activity, including job creation, increased wages, and revenues.
- (d) The extent to which the project efficiently interacts with and supports the transportation network.
 - (e) A commitment of a funding match.
- (f) The amount of investment or commitments made by the owner or developer of the existing or proposed facility.
- (g) The extent to which the owner has commitments, including memorandums of understanding or memorandums of agreements, with private sector businesses planning to locate operations at the intermodal logistics center.
- (h) Demonstrated local financial support and commitment to the project.
- (4) The department shall coordinate and consult with the Department of Economic Opportunity in the selection of projects

20121998e2

to be funded by this program.

- (5) The department may administer contracts on behalf of the entity selected to receive funding for a project under this section.
- (6) The department shall provide up to 50 percent of project costs for eligible projects.
- (7) Beginning in fiscal year 2012-2013, up to \$5 million per year shall be made available from the State Transportation Trust Fund for the program. The Department of Transportation shall include projects proposed to be funded under this section in the tentative work program developed pursuant so s. 339.135(4).
- (8) The Department of Transportation may adopt rules to administer this section.
- Section 8. Subsection (2) of section 311.22, Florida Statutes, is amended to read:
- 311.22 Additional authorization for funding certain dredging projects.—
- (2) The council shall adopt rules for evaluating the projects that may be funded pursuant to this section. The rules must provide criteria for evaluating the economic benefit of the project. The rules must include the creation of an administrative review process by the council which is similar to the process described in s. $\underline{311.09(5)-(11)}$ $\underline{311.09(5)-(12)}$, and provide for a review by the Department of Transportation and the Department of Economic Opportunity of all projects submitted for funding under this section.
- Section 9. Paragraph (b) of subsection (1) and paragraph (c) of subsection (2) of section 316.302, Florida Statutes, are

20121998e2

(6) Notwithstanding chapter 116, each every county officer within this state authorized to collect funds provided for in this chapter shall pay all sums officially received by the officer into the State Treasury no later than 5 working days after the close of the business day in which the officer received the funds. Payment by county officers to the state shall be made by means of electronic funds transfer.

Section 12. Funds that result from increased revenues to the State Transportation Trust Fund derived from the amendments to s. 319.32(5)(a), Florida Statutes, made by this act must be used as follows, notwithstanding any other provision of law:

- (1) (a) In the 2012-2013 fiscal year, \$200 million, or actual receipts up to \$200 million, shall be transferred to the General Revenue Fund.
- (b) The Department of Transportation shall transfer the actual receipts monthly to the General Revenue Fund. These transfers shall be made in the month following the deposit of those receipts into the State Transportation Trust Fund.
- (2) Beginning in 2013-2014 fiscal year and annually for up to 30 years thereafter, \$10 million shall be for the purpose of funding any seaport project identified in the adopted work program of the Department of Transportation, to be known as the Seaport Investment Program. The revenues may be assigned, pledged, or set aside as a trust for the payment of principal or interest on bonds, tax anticipation certificates, or other forms of indebtedness issued by an individual port or appropriate local government having jurisdiction thereof, or collectively by interlocal agreement among any of the ports, or used to purchase credit support to permit such borrowings. However, the debt is

not a general obligation of the state. The state covenants with holders of the revenue bonds or other instruments of indebtedness issued pursuant to this subsection that it will not repeal or impair or amend this subsection in any manner that will materially or adversely affect the rights of holders so long as bonds authorized by this subsection are outstanding. The proceeds of any bonds or other indebtedness secured by a pledge of the funding, after payment of costs of issuance and establishment of any required reserves, shall be invested in projects approved by the Department of Transportation and included in the department's adopted work program, by amendment if necessary. Any revenues that are not pledged to the repayment of bonds as authorized by this section may be used for purposes authorized under the Florida Seaport Transportation and Economic Development Program. This revenue source is in addition to any amounts provided for and appropriated in accordance with ss. 311.07 and 320.20(3) and (4), Florida Statutes. Revenue bonds shall be issued by the Division of Bond Finance at the request of the Department of Transportation pursuant to the State Bond Act.

- (3) Beginning in the 2013-2014 fiscal year and annually for up to 30 years thereafter, \$35 million shall be transferred to Florida's Turnpike Enterprise, to be used in accordance with Florida Turnpike Enterprise Law, to the maximum extent feasible for feeder roads, structures, interchanges, appurtenances, and other rights to create or facilitate access to the existing turnpike system.
- (4) Beginning in the 2013-2014 fiscal year and annually thereafter, \$10 million shall be transferred to the

20121998e2

Transportation Disadvantaged Trust Fund, to be used as specified in s. 427.0159, Florida Statutes.

- (5) Beginning in the 2013-2014 fiscal year and annually thereafter, \$10 million shall be allocated to the Small County Outreach Program, to be used as specified in s. 339.2818, Florida Statutes. These funds are in addition to the funds provided in s. 201.15(1)(c)1.b., Florida Statutes.
- (6) After the distributions required pursuant to subsections (1)-(5), the remaining funds shall be used annually for transportation projects within this state for existing or planned strategic transportation projects which connect major markets within this state or between this state and other states, which focus on job creation, and which increase this state's viability in the national and global markets.
- (7) Pursuant to s. 339.135(7), Florida Statutes, the department shall amend the work program to add the projects provided for in this section.

Section 13. Subsections (3) and (4) of section 320.20, Florida Statutes, are amended to read:

- 320.20 Disposition of license tax moneys.—The revenue derived from the registration of motor vehicles, including any delinquent fees and excluding those revenues collected and distributed under the provisions of s. 320.081, must be distributed monthly, as collected, as follows:
- (3) Notwithstanding any other provision of law except subsections (1) and (2), on July 1, 1996, and annually thereafter, \$15 million shall be deposited annually into in the State Transportation Trust Fund solely for the purposes of funding the Florida Seaport Transportation and Economic

Development Program as provided for in chapter 311. Such revenues shall be distributed on a 50-50 matching basis to any port listed in s. 311.09(1) to be used for funding projects as described in s. 311.07(3)(b). Such revenues may be assigned, pledged, or set aside as a trust for the payment of principal or interest on bonds, tax anticipation certificates, or any other form of indebtedness issued by an individual port or appropriate local government having jurisdiction thereof, or collectively by interlocal agreement among any of the ports, or used to purchase credit support to permit such borrowings. However, such debt is shall not constitute a general obligation of the state of Florida. The state covenants does hereby covenant with holders of such revenue bonds or other instruments of indebtedness issued hereunder that it will not repeal or impair or amend in any manner that which will materially and adversely affect the rights of such holders so long as bonds authorized by this section are outstanding. Any revenues that which are not pledged to the repayment of bonds as authorized by this section may be used utilized for purposes authorized under the Florida Seaport Transportation and Economic Development Program. This revenue source is in addition to any amounts provided for and appropriated in accordance with s. 311.07. The Florida Seaport Transportation and Economic Development Council shall approve the distribution of funds to ports for projects that which have been approved pursuant to s. $311.09(5)-(8) \frac{311.09(5)-(9)}{100}$. The council and the Department of Transportation may are authorized to perform such acts as are required to facilitate and implement the provisions of this subsection. To better enable the ports to cooperate to their mutual advantage, the governing body of each

port may exercise powers provided to municipalities or counties in s. 163.01(7)(d) subject to the provisions of chapter 311 and special acts, if any, pertaining to a port. The use of funds provided pursuant to this subsection are limited to eligible projects listed in this subsection. Income derived from a project completed with the use of program funds, beyond operating costs and debt service, is shall be restricted solely to further port capital improvements consistent with maritime purposes and for no other purpose. Use of such income for nonmaritime purposes is prohibited. The provisions of s. 311.07(4) do not apply to any funds received pursuant to this subsection. The revenues available under this subsection may shall not be pledged to the payment of any bonds other than the Florida Ports Financing Commission Series 1996 and Series 1999 Bonds currently outstanding; provided, however, such revenues may be pledged to secure payment of refunding bonds to refinance the Florida Ports Financing Commission Series 1996 and Series 1999 Bonds. No Refunding bonds secured by revenues available under this subsection may not be issued with a final maturity later than the final maturity of the Florida Ports Financing Commission Series 1996 and Series 1999 Bonds or which provide for higher debt service in any year than is currently payable on such bonds. Any revenue bonds or other indebtedness issued after July 1, 2000, other than refunding bonds shall be issued by the Division of Bond Finance at the request of the Department of Transportation pursuant to the State Bond Act.

(4) Notwithstanding any other provision of law except subsections (1), (2), and (3), on July 1, 1999, and annually thereafter, \$10 million shall be deposited annually into in the

20121998e2

State Transportation Trust Fund solely for the purposes of funding the Florida Seaport Transportation and Economic Development Program as provided in chapter 311 and for funding seaport intermodal access projects of statewide significance as provided in s. 341.053. Such revenues shall be distributed to any port listed in s. 311.09(1), to be used for funding projects as follows:

- (a) For any seaport intermodal access projects that are identified in the 1997-1998 Tentative Work Program of the Department of Transportation, up to the amounts needed to offset the funding requirements of this section.
- (b) For seaport intermodal access projects as described in s. 341.053(5) which that are identified in the 5-year Florida Seaport Mission Plan as provided in s. 311.09(3). Funding for such projects shall be on a matching basis as mutually determined by the Florida Seaport Transportation and Economic Development Council and the Department of Transportation if, provided a minimum of 25 percent of total project funds shall come from any port funds, local funds, private funds, or specifically earmarked federal funds.
- (c) On a 50-50 matching basis for projects as described in s. 311.07(3) (b).
- (d) For seaport intermodal access projects that involve the dredging or deepening of channels, turning basins, or harbors; or the rehabilitation of wharves, docks, or similar structures. Funding for such projects requires shall require a 25 percent match of the funds received pursuant to this subsection. Matching funds must shall come from any port funds, federal funds, local funds, or private funds.

20121998e2

1075 Such revenues may be assigned, pledged, or set aside as a trust 1076 for the payment of principal or interest on bonds, tax 1077 anticipation certificates, or any other form of indebtedness 1078 issued by an individual port or appropriate local government 1079 having jurisdiction thereof, or collectively by interlocal 1080 agreement among any of the ports, or used to purchase credit 1081 support to permit such borrowings. However, such debt is shall 1082 not constitute a general obligation of the state. This state 1083 covenants does hereby covenant with holders of such revenue bonds or other instruments of indebtedness issued hereunder that 1084 1085 it will not repeal or impair or amend this subsection in any 1086 manner that which will materially and adversely affect the 1087 rights of holders so long as bonds authorized by this subsection 1088 are outstanding. Any revenues that are not pledged to the 1089 repayment of bonds as authorized by this section may be used 1090 utilized for purposes authorized under the Florida Seaport 1091 Transportation and Economic Development Program. This revenue 1092 source is in addition to any amounts provided for and 1093 appropriated in accordance with s. 311.07 and subsection (3). 1094 The Florida Seaport Transportation and Economic Development 1095 Council shall approve distribution of funds to ports for 1096 projects that have been approved pursuant to s. 311.09(5)-(8) 1097 311.09(5)-(9), or for seaport intermodal access projects 1098 identified in the 5-year Florida Seaport Mission Plan as 1099 provided in s. 311.09(3) and mutually agreed upon by the FSTED 1100 Council and the Department of Transportation. All contracts for actual construction of projects authorized by this subsection 1101 1102 must include a provision encouraging employment of participants

20121998e2

1103 in the welfare transition program. The goal for such employment 1104 of participants in the welfare transition program is 25 percent of all new employees employed specifically for the project, 1105 1106 unless the Department of Transportation and the Florida Seaport 1107 Transportation and Economic Development Council demonstrate that such a requirement would severely hamper the successful 1108 1109 completion of the project. In such an instance, Workforce 1110 Florida, Inc., shall establish an appropriate percentage of employees who are that must be participants in the welfare 1111 1112 transition program. The council and the Department of 1113 Transportation may are authorized to perform such acts as are required to facilitate and implement the provisions of this 1114 1115 subsection. To better enable the ports to cooperate to their 1116 mutual advantage, the governing body of each port may exercise 1117 powers provided to municipalities or counties in s. 163.01(7)(d) subject to the provisions of chapter 311 and special acts, if 1118 1119 any, pertaining to a port. The use of funds provided pursuant to 1120 this subsection is limited to eligible projects listed in this 1121 subsection. The provisions of s. 311.07(4) do not apply to any 1122 funds received pursuant to this subsection. The revenues available under this subsection may shall not be pledged to the 1123 1124 payment of any bonds other than the Florida Ports Financing Commission Series 1996 and Series 1999 Bonds currently 1125 1126 outstanding; provided, however, such revenues may be pledged to 1127 secure payment of refunding bonds to refinance the Florida Ports 1128 Financing Commission Series 1996 and Series 1999 Bonds. No Refunding bonds secured by revenues available under this 1129 1130 subsection may not be issued with a final maturity later than the final maturity of the Florida Ports Financing Commission 1131

20121998e2

Series 1996 and Series 1999 Bonds or which provide for higher debt service in any year than is currently payable on such bonds. Any revenue bonds or other indebtedness issued after July 1, 2000, other than refunding bonds shall be issued by the Division of Bond Finance at the request of the Department of Transportation pursuant to the State Bond Act.

Section 14. <u>Section 320.204</u>, <u>Florida Statutes</u>, <u>is repealed</u>. Section 15. Subsection (3) of section 322.07, Florida Statutes, is amended to read:

322.07 Instruction permits and temporary licenses.-

- (3) Any person who, except for his or her lack of instruction in operating a commercial motor vehicle, would otherwise be qualified to obtain a commercial <u>driver driver's</u> license under this chapter, may apply for a temporary commercial instruction permit. The department shall issue such a permit entitling the applicant, while having the permit in his or her immediate possession, to drive a commercial motor vehicle on the highways, if provided that:
- (a) The applicant possesses a valid <u>Florida driver driver's</u> license <u>issued in any state</u>; and
- (b) The applicant, while operating a commercial motor vehicle, is accompanied by a licensed driver who is 21 years of age or older, who is licensed to operate the class of vehicle being operated, and who is actually occupying the closest seat to the right of the driver.

Section 16. Subsection (2) of section 322.53, Florida Statutes, is amended to read:

322.53 License required; exemptions.-

(2) The following persons are exempt from the requirement

20121998e2

metropolitan planning organization. If such turnpike project does not fall within the jurisdiction of a metropolitan planning organization, the department shall notify the affected county and provide for public hearings in accordance with s. 339.155(6)(c).

Section 29. Section 338.251, Florida Statutes, is repealed.

Section 30. Paragraph (f) of subsection (1) of section

339.08, Florida Statutes, is amended to read:

- 339.08 Use of moneys in State Transportation Trust Fund.-
- (1) The department shall expend moneys in the State
 Transportation Trust Fund accruing to the department, in
 accordance with its annual budget. The use of such moneys shall
 be restricted to the following purposes:
- (f) To pay the cost of economic development transportation projects in accordance with s. 339.2821 288.063.
- Section 31. Section 339.139, Florida Statutes, is created to read:
 - 339.139 Transportation debt assessment.-
- (1) It is the policy of the state to manage the financing of transportation infrastructure in a manner that ensures the fiscal integrity of the State Transportation Trust Fund.
- (2) The department shall provide a debt and debtlike contractual obligations load report to the Executive Office of the Governor, the President of the Senate, the Speaker of the House of Representatives, and the legislative appropriations committees in conjunction with the tentative work program required under s. 339.135. The debt and debtlike contractual obligations load report must include the following data on current and planned department commitments that are payable from

20121998e2

the State Transportation Trust Fund:

- (a) Debt service payments that are required to be made under any resolution for the issuance of bonds secured by a lien on federal highway aid reimbursements or motor fuel and diesel fuel taxes.
- (b) Funding for seaports which has been pledged to the payment of principal and interest on bonds issued by the Florida Ports Financing Commission pursuant to s. 320.20.
- (c) Commitments of the department to pay the costs of operating, maintaining, repairing, and rehabilitating expressway and bridge systems under the terms of lease-purchase agreements which are enforceable by the holders of bonds issued by expressway and bridge authorities pursuant to chapter 348.
- (d) Availability, milestone, and final acceptance payments that are required by public-private partnerships pursuant to s. 334.30 and that are not payments for the cost of operation or maintenance of a facility.
- (e) Agreed-on payments to a department contractor for work performed in the current fiscal year for which payment is deferred to a later fiscal year pursuant to s. 334.30.
- (f) Reimbursements to local governments for work performed on a project if the reimbursement is deferred to a later fiscal year pursuant to s. 339.12.
- (g) Loan repayments on state infrastructure bank loans extended to a department district pursuant to s. 339.55.
- (3) The department shall manage all levels of debt to ensure that by the beginning of the 2017-2018 fiscal year, not more than 20 percent of total projected available state and federal revenues from the State Transportation Trust Fund,

20121998e2

together with any local funds committed to department projects, are committed to the obligations identified in subsection (2) in any year.

- would justify exceeding the limitation established in this section, the department shall notify the Governor, the President of the Senate, the Speaker of the House of Representatives, and the chairs of the legislative appropriations committees. The notification must identify the critical project and the projected impact on the department's total debt load. The department may proceed with the project upon approval by the Governor. If either chair of the legislative appropriations committees, the President of the Senate, or the Speaker of the House of Representatives objects in writing to a proposed project within 14 days after submittal of a department request to exceed debt limits and specifies the reasons for such objection, the Governor may not approve the project.
- (5) The department shall prepare a separate report on debt obligations that are secured by and payable solely from pledged revenues. The department shall provide the report on pledged revenue debt to the Executive Office of the Governor, the President of the Senate, the Speaker of the House of Representatives, and the legislative appropriations committees in conjunction with the tentative work program required under s. 339.135.

Section 32. Section 339.2821, Florida Statutes, is created to read:

339.2821 Economic development transportation projects.—
(1) (a) The department, in consultation with the Department

20121998e2

of Economic Opportunity, may make and approve expenditures and contract with the appropriate governmental body for the direct costs of transportation projects. The Department of Economic Opportunity and the Department of Environmental Protection may formally review and comment on recommended transportation projects, although the department has final approval authority for any project authorized under this section.

- (b) As used in this section, the term:
- 1. "Governmental body" means an instrumentality of the state or a county, municipality, district, authority, board, or commission, or an agency thereof, within which jurisdiction the transportation project is located and which is responsible to the department for the transportation project.
- 2. "Transportation project" means a transportation facility, as defined in s. 334.03, which the department, in consultation with the Department of Economic Opportunity, deems necessary to facilitate the economic development and growth of the state.
- (2) The department, in consultation with the Department of Economic Opportunity, shall review each transportation project for approval and funding. In the review, the department must consider:
- (a) The cost per job created or retained considering the amount of transportation funds requested;
 - (b) The average hourly rate of wages for jobs created;
- (c) The reliance on any program as an inducement for determining the transportation project's location;
- (d) The amount of capital investment to be made by a business;

20121998e2

| 1654 | (e) The demonstrated local commitment; |
|------|--|
| 1655 | (f) The location of the transportation project in an |
| 1656 | enterprise zone as designated in s. 290.0055; |
| 1657 | (g) The location of the transportation project in a |
| 1658 | spaceport territory as defined in s. 331.304; |
| 1659 | (h) The unemployment rate of the surrounding area; and |
| 1660 | (i) The poverty rate of the community. |
| 1661 | |
| 1662 | The department may contact any agency it deems appropriate for |
| 1663 | additional information regarding the approval of a |
| 1664 | transportation project. A transportation project must be |
| 1665 | approved by the department to be eligible for funding. |
| 1666 | (3)(a) The department must approve a transportation project |
| 1667 | if it determines that the transportation project will: |
| 1668 | 1. Attract new employment opportunities to the state or |
| 1669 | expand or retain employment in existing companies operating |
| 1670 | within the state. |
| 1671 | 2. Allow for the construction or expansion of a state or |
| 1672 | federal correctional facility in a county having a population of |
| 1673 | 75,000 or fewer which creates new employment opportunities or |
| 1674 | expands or retains employment in the county. |
| 1675 | (b) The department must ensure that small and minority |
| 1676 | businesses have equal access to participate in transportation |
| 1677 | projects funded pursuant to this section. |
| 1678 | (c) In addition to administrative costs and equipment |
| 1679 | purchases specified in the contract, funds for approved |
| 1680 | transportation projects may be used for expenses that are |
| 1681 | necessary for building new, or improving existing, |

transportation facilities. Funds made available pursuant to this

20121998e2

section may not be expended for the relocation of a business from one community to another community in this state unless the department determines that, without the relocation, the business will move outside the state or determines that the business has a compelling economic reason for the relocation, such as creating additional jobs.

- (4) A contract between the department and a governmental body for a transportation project must:
- (a) Specify that the transportation project is for the construction of a new or expanding business and specify the number of full-time permanent jobs that will result from the project.
- (b) Identify the governmental body and require that the governmental body award the construction of the particular transportation project to the lowest and best bidder in accordance with applicable state and federal statutes or rules unless the transportation project can be constructed using existing local governmental employees within the contract period specified by the department.
- (c) Require that the governmental body provide the department with quarterly progress reports. Each quarterly progress report must contain:
- 1. A narrative description of the work completed and whether the work is proceeding according to the transportation project schedule;
- 2. A description of each change order executed by the governmental body;
- 3. A budget summary detailing planned expenditures compared to actual expenditures; and

20121998e2

- $\underline{\text{4. The identity of each small or minority business used as}}$ a contractor or subcontractor.
- (d) Require that the governmental body make and maintain records in accordance with accepted governmental accounting principles and practices for each progress payment made for work performed in connection with the transportation project, each change order executed by the governmental body, and each payment made pursuant to a change order. The records are subject to financial audit as required by law.
- (e) Require that the governmental body, upon completion and acceptance of the transportation project, certify to the department that the transportation project has been completed in compliance with the terms and conditions of the contract between the department and the governmental body and meets the minimum construction standards established in accordance with s. 336.045.
- (f) Specify that the department transfer funds to the governmental body not more often than quarterly, upon receipt of a request for funds from the governmental body and consistent with the needs of the transportation project. The governmental body shall expend funds received from the department in a timely manner. The department may not transfer funds unless construction has begun on the facility of a business on whose behalf the award was made. A contract totaling less than \$200,000 is exempt from the transfer requirement.
- (g) Require that funds be used only on a transportation project that has been properly reviewed and approved in accordance with the criteria set forth in this section.
 - (h) Require that the governing board of the governmental

20121998e2

body adopt a resolution accepting future maintenance and other attendant costs occurring after completion of the transportation project if the transportation project is constructed on a county or municipal system.

- (5) For purposes of this section, Space Florida may serve as the governmental body or as the contracting agency for a transportation project within spaceport territory as defined by s. 331.304.
- (6) Each governmental body receiving funds under this section shall submit to the department a financial audit of the governmental body conducted by an independent certified public accountant. The department, in consultation with the Department of Economic Opportunity, shall develop procedures to ensure that audits are received and reviewed in a timely manner and that deficiencies or questioned costs noted in the audit are resolved.
- (7) The department shall monitor the construction or building site for each transportation project that receives funding under this section, including, but not limited to, the construction of the business facility, to ensure compliance with contractual requirements.

Section 33. In order to implement sections 1 and 32 of this act, which transfer the responsibility of administering economic development transportation projects from the Department of Economic Opportunity to the Department of Transportation, with minimal disruption of services, the Department of Economic Opportunity shall transfer the following to the Department of Transportation:

(1) All powers, duties, functions, records, pending issues,

20121998e2

existing contracts, administrative authority, administrative rules, and unexpended balances of appropriations, allocations, or other funds relating to the Economic Development

Transportation program.

- (2) Any unexpended balances of released appropriations and appropriations that remain unreleased, and any funds remaining in the Economic Development Trust Fund relating to economic development transportation projects.
- (3) Any binding contract or interagency agreement in effect between the Department of Economic Opportunity and any other agency, entity, or person shall continue as a binding contract or agreement for the remainder of the term of such contract or agreement on the successor department responsible for the program.

Section 34. Section 339.2825, Florida Statutes, is created to read:

339.2825 Approval of contractor-financed projects.-

(1) Before the department solicits proposals pursuant to s. 334.30 to advance a project programmed in the adopted 5-year work program or in the 10-year Strategic Intermodal Plan using funds provided by a public-private partnership or a private entity to be reimbursed from department funds for the project as programmed in the adopted work program, the department must provide a summary of the proposed project to the Executive Office of the Governor, the chair of each legislative appropriations committee, the President of the Senate, and the Speaker of the House of Representatives. The summary must include a description of any anticipated commitment by the department for the years outside the adopted work program, a

description of the anticipated impacts on the department's overall debt load, and sufficient information to demonstrate that the project will not cause the department to exceed the overall debt limitation provided in s. 339.139. The department may proceed with the project upon approval of the Governor. If the chair of either legislative appropriations committee, the President of the Senate, or the Speaker of the House of Representatives objects to the proposed project in writing within 14 days after receipt of the summary, the Governor may not approve the project.

(2) If the department receives an unsolicited proposal pursuant to s. 334.30 to advance a project programmed in the adopted 5-year work program or in the 10-year Strategic Intermodal Plan using funds provided by public-private partnerships or private entities to be reimbursed from department funds for the project as programmed in the adopted work program, the department shall provide a summary of the proposed project to the Executive Office of the Governor, the chair of each legislative appropriations committee, the President of the Senate, and the Speaker of the House of Representatives before the department advertises receipt of the proposal as provided in s. 334.30. The summary must include a description of any anticipated commitments by the department for the years outside the adopted work program, a description of any anticipated impacts on the department's overall debt load, and sufficient information to demonstrate that the project will not cause the department to exceed the overall debt limitation provided in s. 339.14. The department may not accept the unsolicited proposal, advertise receipt of the unsolicited

20121998e2

proposal, or solicit other proposals for the same project purpose without the approval of the Executive Office of the Governor. If the chair of either legislative appropriations committee, the President of the Senate, or the Speaker of the House of Representatives objects to the proposed project in writing within 14 days after receipt of the summary, the Executive Office of the Governor may not approve the proposed project.

(3) This section does not apply to a public-private partnership agreement authorized in s. 334.30(2)(a).

Section 35. Subsection (5) is added to section 339.63, Florida Statutes, to read:

339.63 System facilities designated; additions and deletions.—

(5) (a) The Secretary of Transportation shall designate a planned facility as part of the Strategic Intermodal System upon request of the facility if it meets the criteria and thresholds established by the department pursuant to subsection (4), meets the definition of an intermodal logistics center, and has been designated in a local comprehensive plan or local government development order as an intermodal logistics center or an equivalent planning term. For the purpose of this section, the term "intermodal logistics center" means a facility or group of facilities, including, but not limited to, an inland port, serving as a point of intermodal transfer of freight in a specific area physically separated from a seaport whose activities relating to transport, logistics, goods distribution, consolidation, or value-added activities are carried out and whose activities and services are designed to support or be

20121998e2

supported by one or more seaports, as provided in s. 311.09, or an airport whose activities and services are designed to support the transport, logistics, goods distribution, consolidation, or value added activities related to airborne cargo.

- (b) A facility designated part of the Strategic Intermodal System pursuant to paragraph (a) which is within the jurisdiction of a local government and which maintains a transportation concurrency system shall receive a waiver of transportation concurrency requirements applicable to Strategic Intermodal System facilities in order to accommodate any development at the facility which occurs pursuant to a building permit issued on or before December 31, 2017, but only if such facility is located:
- 1. Within an area designated pursuant to s. 288.0656(7) as a rural area of critical economic concern;
- 2. Within a rural enterprise zone as defined in s. 290.004(5); or
- 3. Within 15 miles of the boundary of a rural area of critical economic concern or a rural enterprise zone.

Section 36. Section 348.7546, Florida Statutes, is amended to read:

348.7546 Wekiva Parkway, construction authorized; financing.—Notwithstanding s. 338.2275,

(1) The Orlando-Orange County Expressway Authority is hereby authorized to exercise its condemnation powers and to, construct, finance, operate, own, and maintain those portions of the Wekiva Parkway which are identified by agreement between the authority and the department and which are included as part of the authority's long-range capital improvement plan. The "Wekiva

projects shall be given priority ranking to the extent practicable for grants administered under state energy programs.

Section 41. The funds in the Toll Facilities Revolving
Trust Fund and all future payments of obligated funds shall be
deposited into the State Transportation Trust Fund to be
expended for the purposes specified in s. 339.08, Florida
Statutes.

Section 42. Notwithstanding s. 120.569, s. 120.57, or s. 373.427, Florida Statutes, or any other provision of law to the contrary, a challenge to a consolidated environmental resource permit or an associated variance or a sovereign submerged lands authorization proposed or issued by the Department of Environmental Protection in connection with the state's deepwater ports, as listed in s. 403.021(9), Florida Statutes, shall be conducted pursuant to the summary hearing provisions of s. 120.574, Florida Statutes. However, the summary proceeding shall be conducted within 30 days after a party files a motion for a summary hearing, regardless of whether the parties agree to the summary proceeding, and the administrative law judge's decision shall be in the form of a recommended order and does not constitute final agency action of the department. The Department of Environmental Protection shall issue the final order within 45 working days after receipt of the administrative law judge's recommended order. The summary hearing provisions of this section apply to pending administrative proceedings, however, s. 120.574(1)(b) and (d) and (2)(a)3. and 5., Florida Statutes, do not apply to pending administrative proceedings. This section shall take effect upon this act becoming a law.

Section 43. Except as otherwise expressly provided in this

Section 5. Paragraph (d) of subsection (6) of section 373.4136, Florida Statutes, is amended to read:

- 373.4136 Establishment and operation of mitigation banks.-
- management district shall establish a mitigation service area for each mitigation bank permit. The department or water management district shall notify and consider comments received on the proposed mitigation service area from each local government within the proposed mitigation service area. Except as provided herein, mitigation credits may be withdrawn and used only to offset adverse impacts in the mitigation service area. The boundaries of the mitigation service area shall depend upon the geographic area where the mitigation bank could reasonably be expected to offset adverse impacts. Mitigation service areas may overlap, and mitigation service areas for two or more mitigation banks may be approved for a regional watershed.
- (d) If the requirements in s. 373.414(1)(b) and (8) are met, the following projects or activities regulated under this part shall be eligible to use a mitigation bank, regardless of whether they are located within the mitigation service area:
- 1. Projects with adverse impacts partially located within the mitigation service area.
- 2. Linear projects, such as roadways, transmission lines, distribution lines, pipelines, or railways, or seaports listed in s. 311.09(1).
- 3. Projects with total adverse impacts of less than 1 acre in size.

Page 40 of 188

- 1513 (d) The extent to which the project efficiently interacts
 1514 with and supports the transportation network.
 - (e) A commitment of a funding match.
 - (f) The amount of investment or commitments made by the owner or developer of the existing or proposed facility.
 - (g) The extent to which the owner has commitments, including memorandums of understanding or memorandums of agreements, with private sector businesses planning to locate operations at the intermodal logistics center.
 - (h) Demonstrated local financial support and commitment to the project.
 - (4) The department shall coordinate and consult with the Department of Economic Opportunity in the selection of projects to be funded by this program.
 - (5) The department is authorized to administer contracts on behalf of the entity selected to receive funding for a project under this section.
 - (6) The department shall provide up to 50 percent of project costs for eligible projects.
 - (7) Beginning in fiscal year 2012-2013, up to \$5 million per year shall be made available from the State Transportation

 Trust Fund for the program. The Department of Transportation shall include projects proposed to be funded under this section in the tentative work program developed pursuant so s.

 339.135(4).
- 1538 (8) The Department of Transportation is authorized to adopt rules to implement this section.
 - Section 13. Section 311.106, Florida Statutes, is created

Page 55 of 188

1541 to read:

seaport listed in s. 403.021(9) (b) is authorized to provide for onsite or offsite stormwater treatment for water quality impacts caused by a proposed port activity that requires a permit and that causes or contributes to pollution from stormwater runoff. Offsite stormwater treatment may occur outside of the established boundaries of the port, but must be within the same drainage basin in which the port activity occurs. A port offsite stormwater treatment project must be constructed and maintained by the seaport or by the seaport in conjunction with an adjacent local government. In order to limit stormwater treatment from individual parcels within a port, a seaport may provide for a regional stormwater treatment facility that must be constructed and maintained by the seaport or by the seaport in conjunction with an adjacent local government.

Section 14. Section 311.14, Florida Statutes, is amended to read:

311.14 Seaport planning.-

(1) The Department of Transportation shall develop, in coordination with the ports listed in s. 311.09(1) and other partners, a Statewide Seaport and Waterways System Plan. This plan shall be consistent with the goals of the Florida

Transportation Plan developed pursuant to s. 339.155 and shall consider needs identified in individual port master plans and those from the seaport strategic plans required under this section. The plan will identify 5-year, 10-year, and 20-year needs for the seaport system and will include seaport, waterway,

Page 56 of 188

CODING: Words stricken are deletions; words underlined are additions.

road, and rail projects that are needed to ensure the success of the transportation system as a whole in supporting state economic development goals The Florida Scaport Transportation and Economic Development Council, in cooperation with the Office of the State Public Transportation Administrator within the Department of Transportation, shall develop freight-mobility and trade-corridor plans to assist in making freight-mobility investments that contribute to the economic growth of the state. Such plans should enhance the integration and connectivity of the transportation system across and between transportation modes throughout Florida for people and freight.

Administrator shall act to integrate freight-mobility and tradecorridor plans into the Florida Transportation Plan developed
pursuant to s. 339.155 and into the plans and programs of
metropolitan planning organizations as provided in s. 339.175.
The office may also provide assistance in expediting the
transportation permitting process relating to the construction
of seaport freight-mobility projects located outside the
physical borders of seaports. The Department of Transportation
may contract, as provided in s. 334.044, with any port listed in
s. 311.09(1) or any such other statutorily authorized seaport
entity to act as an agent in the construction of seaport
freight-mobility projects.

- $\underline{(2)}$ Each port shall develop a strategic plan with a 10-year horizon. Each plan must include the following:
- (a) An economic development component that identifies targeted business opportunities for increasing business and

Page 57 of 188

attracting new business for which a particular facility has a strategic advantage over its competitors, identifies financial resources and other inducements to encourage growth of existing business and acquisition of new business, and provides a projected schedule for attainment of the plan's goals.

- (b) An infrastructure development and improvement component that identifies all projected infrastructure improvements within the plan area which require improvement, expansion, or development in order for a port to attain a strategic advantage for competition with national and international competitors.
- (c) A component that identifies all intermodal transportation facilities, including sea, air, rail, or road facilities, which are available or have potential, with improvements, to be available for necessary national and international commercial linkages and provides a plan for the integration of port, airport, and railroad activities with existing and planned transportation infrastructure.
- (d) A component that identifies physical, environmental, and regulatory barriers to achievement of the plan's goals and provides recommendations for overcoming those barriers.
- (e) An intergovernmental coordination component that specifies modes and methods to coordinate plan goals and missions with the missions of the Department of Transportation, other state agencies, and affected local, general-purpose governments.

To the extent feasible, the port strategic plan must be

Page 58 of 188

CODING: Words stricken are deletions; words underlined are additions.

consistent with the local government comprehensive plans of the units of local government in which the port is located. Upon approval of a plan by the port's board, the plan shall be submitted to the Florida Seaport Transportation and Economic Development Council.

(3) (4) The Florida Seaport Transportation and Economic Development Council shall review the strategic plans submitted by each port and prioritize strategic needs for inclusion in the Florida Seaport Mission Plan prepared pursuant to s. 311.09(3).

Section 15. Subsection (21) of section 316.003, Florida Statutes, is amended to read:

316.003 Definitions.—The following words and phrases, when used in this chapter, shall have the meanings respectively ascribed to them in this section, except where the context otherwise requires:

- (21) MOTOR VEHICLE.—Except when used in s. 316.1001, any self-propelled vehicle not operated upon rails or guideway, but not including any bicycle, motorized scooter, electric personal assistive mobility device, or moped. For purposes of s. 316.1001, "motor vehicle" has the same meaning as in s. 320.01(1)(a).
- Section 16. Subsection (4) of section 316.091, Florida Statutes, is amended, subsection (5) is renumbered as subsection (7), and new subsections (5) and (6) are added to that section, to read:
- 1650 316.091 Limited access facilities; interstate highways; 1651 use restricted.—
 - (4) No person shall operate a bicycle or other human-

- (13) To designate existing and to plan proposed transportation facilities as part of the State Highway System, and to construct, maintain, and operate such facilities.
- To provide for the enhancement of environmental benefits, including air and water quality; to prevent roadside erosion; to conserve the natural roadside growth and scenery; and to provide for the implementation and maintenance of roadside conservation, enhancement, and stabilization programs. No less than 1.5 percent of the amount contracted for construction projects shall be allocated by the department on a statewide basis for the purchase of plant materials. Department districts may not expend funds for landscaping in connection with any project that is limited to resurfacing existing lanes unless the expenditure has been approved by the department's secretary or the secretary's designee. Twith, To the greatest extent practical, a minimum of 50 percent of the these funds allocated under this subsection shall be allocated for large plant materials and the remaining funds for other plant materials. All such plant materials shall be purchased from Florida commercial nursery stock in this state on a uniform competitive bid basis. The department shall will develop grades and standards for landscaping materials purchased through this process. To accomplish these activities, the department may contract with nonprofit organizations having the primary purpose of developing youth employment opportunities.
- (33) To develop, in coordination with its partners and stakeholders, a Freight Mobility and Trade Plan to assist in making freight mobility investments that contribute to the

Page 72 of 188

- economic growth of the state. Such plan should enhance the integration and connectivity of the transportation system across and between transportation modes throughout the state. The department shall deliver the Freight Mobility and Trade Plan to the Governor, the President of the Senate, and the Speaker of the House of Representatives by July 1, 2013.
- (a) The Freight Mobility and Trade Plan shall include, but need not be limited to, proposed policies and investments that promote the following:
- 1. Increasing the flow of domestic and international trade through the state's seaports and airports, including specific policies and investments that will recapture cargo currently shipped through seaports and airports located outside the state.
- 2. Increasing the development of intermodal logistic centers in the state, including specific strategies, policies, and investments that capitalize on the empty backhaul trucking and rail market in the state.
- 3. Increasing the development of manufacturing industries in the state, including specific policies and investments in transportation facilities that will promote the successful development and expansion of manufacturing facilities.
- 4. Increasing the implementation of compressed natural gas (CNG), liquefied natural gas (LNG), and propane energy policies that reduce transportation costs for businesses and residents located in the state.
- (b) Freight issues and needs shall also be given emphasis in all appropriate transportation plans, including the Florida Transportation Plan and the Strategic Intermodal System Plan.

Doug Wheeler, President

December 6, 2011

The Honorable John L. Mica United States Representative U.S. House of Representatives 2187 Rayburn House Office Building Washington, DC 20515

Dear Chairman Mica:

The Florida Ports Council (FPC) represents Florida's fifteen public deepwater seaports, providing leadership, advocacy and information on seaport-related issues. On behalf of the FPC, we are writing today about important legislation affecting the nation's vital maritime infrastructure – the Realize America's Maritime Promise Act (RAMP).

The Harbor Maintenance Tax (HMT) is charged against the value of imports and domestic cargo arriving at federally-maintained U.S. seaports and deposited into the Harbor Maintenance Trust Fund (HMTF). The funds in the HMTF are to be used for maintenance dredging and dredged material disposal areas, yet currently only two of the nation's 10th largest ports are dredged to their authorized depths or widths. Every year, hundreds of millions of dollars are collected into the HMTF but never spent. In 2008, less than half of all HMTF revenues were spent on harbor maintenance. Passage of the RAMP Act (H.R. 104 and S. 412) will authorize full access to annual revenues in the HMTF and allow those revenues to be used for their intended purpose – operation and maintenance of ports and harbors.

Our nation's seaports and harbors are gateways to domestic and international trade. Greater than 90 percent of the U.S. foreign trade moves through our nation's more than 300 seaports, representing 25 percent of the U.S. Gross Domestic Product. In Florida alone, this waterborne commerce represents \$69.7 billion in international trade and generates more than 550,000 direct and indirect jobs.

Adequate maintenance and dredging of our harbors are vital to the economic health of this nation. Failure to maintain harbor channels causes vessels to delay their transit while waiting for high tide, skip port calls altogether, or load less than full capacity. This not only impacts our nation's economic vitality, but also increases the risk of vessel grounding, collisions and pollution incidents.

The resolution of the problem does not require an increase in taxes or funding. Similar problems were resolved with the Highway Trust Fund and the Airports and Airways Trust Fund. The Congress responded by enacting legislation to more closely tie trust fund expenditure and revenues.

The Ramp Act will provide a comparable fix for the HMTF – spending those revenues for their intended purposes on operation and maintenance of seaports and harbors.

We urge your support of this important legislation to invest in our nation's vital infrastructure.

Respectfully,

Doug Wheeler

February 29, 2012

The Honorable Marco Rubio United States Senate 317 Hart Senate Office Building Washington, DC 20510

Subject: Support for Senator Lautenberg & Senator Cantwell's freight amendments to STA

Dear Senator Rubio,

On behalf of the Florida Ports Council, representing Florida's 15 public seaports, I would like to thank you and the other members of the Senate for making the development and enactment of a long-term transportation plan a priority this Congress.

Both the Committee on Environment & Public Works (EPW) and the Committee on Commerce, Science & Transportation (Commerce) have drafted bills that, through their respective modal jurisdictions, give much-deserved support to our nation's freight system. Amendments offered by Senator Cantwell and Senator Lautenberg would build upon this foundation and further address our nation's many freight needs.

Senator Lautenberg's amendment calls for the creation of a competitive National Freight Infrastructure Grants program. This multimodal freight program will serve the economic needs of our country in the near term, and for generations to come, by making investment decisions that optimize freight mobility, unconstrained by mode or political jurisdiction. Many critical projects on our freight network do not qualify under traditional funding mechanisms; the National Freight Infrastructure Grants program would provide resources for these important projects.

Senator Cantwell's amendment calls for the creation of an Office of Freight Planning and Development, to be led by an Assistant Secretary for Freight Planning and Development – two institutional advances supported by the GAO that will improve and coordinate policy within the federal government and among the states. This amendment represents an opportunity to elevate the existing Office of Freight Management and Operations currently housed within the Federal Highway Administration, allowing for consolidation and process streamlining among the various modal agencies that should, but do not always work together on multimodal projects. Providing for an office dedicated to the nation's multimodal goods movement is a vital and long-overdue step forward.

These two amendments can expand our capacity for moving goods, relieve chokepoints and keep our nation competitive in the world marketplace.

We applaud the work of the Senate and we hope that you will support these important freight amendments.

Sincerely,

Doug Wheeler President From: Toy Keller

Subject: Highlights from the Week of April 2, 2012

Attachments: Signed version - Letter to ACOE.pdf; Biter Letter to USACE.pdf; NADO letter April

2012.pdf

Good morning to all. Last week was a very busy week and we would like to share a few items we thought would be of interest to you.

First, as we reported to you several weeks ago, Congress directed the Institute for Water Resources of the U. S. Army Corps of Engineers (USACE) to submit to the Senate and House Committees on Appropriations "a report on how the Congress should address the critical need for additional port and inland waterway modernization to accommodate post-Panamax vessels." We also reported that the Florida Ports Council was preparing a response on behalf of our seaports. With input from Paul Anderson, our Legislative Chairman, the FPC submitted a letter to the Water Resources Division of the U.S. Army Corps on March 28, 2012. This letter also was copied to Governor Rick Scott, Lt. Governor Jennifer Carroll and all of Florida's Congressional delegation members. It is attached.

Second, we reached out to FDOT Assistant Secretary of Intermodal Rich Biter, and let him know that comments from the Department also would be of great value and serve to strongly augment the USACOE's final report on the need for additional port and waterway modernization. Secretary Biter responded and provided us with a copy of the letter from the Department to the USACE. The letter is attached.

Third, the National Organization of Development Organizations (NADO) Research Foundation published a document on March 16, 2012 entitled "Freight Transportation and Economic Development: Planning for the Panama Canal Expansion." As you will see from the report at http://www.nado.org/wp-content/uploads/2012/03/panama.pdf, Florida and Florida seaports are conspicuously absent. Last week we sent a letter to NADO, inviting them to visit our website and our seaports to learn more about projects that enhance capacity and connectivity. This letter also was copied to Governor Rick Scott, FDOT Secretary Prasad, and Gray Swoope, President of Enterprise Florida.

The letter is attached.

Finally, the most recent TIGER IV grant application deadline was March 19, 2012. State and local government agencies submitted **703 applications, totaling \$ 10.2 billion for the \$500 million available**. Similar to past TIGER grant rounds and not surprisingly, demand outpaced supply by 20 to 1. The funding requests in comparison to the money available underscores the growing gap between the nation's infrastructure needs and what the federal government can or will provide.

As always, we will keep you informed of these pertinent issues as they develop. Please give us a call if you have comments or questions.

Thank you,

Toy Keller

Alexandria, Va. 22315

Dear Dr. Cardwell:

Thank you for the opportunity to provide input to the report by the U.S. Army Corps of Engineers (ACOE) on U.S. Port and Inland Waterways Modernization Strategy. Before responding to your Congressional directive on how the critical need for additional port and inland waterway modernization should be addressed, we would like to comment on a broader challenge and more prescient topic.

If a "modernization strategy" is truly what you are developing, perhaps the study should be expanded to include an introspective evaluation of the ACOE's performance with regard to a strategic and efficient approach to project implementation. Florida's seaport community has serious concerns that global trends and industry innovations are not being considered. If the internal organization, culture and performance of the ACOE are factors negatively affecting our country's ability to attract, retain and grow the dynamic jobs of global companies, should we not take advantage of this opportunity to include them in your report? Not improving America's infrastructure now could mean the loss of future American investment and jobs to other countries — a price we can ill afford.

With respect to the factors you have been asked by Congress to address, we offer the following comments:

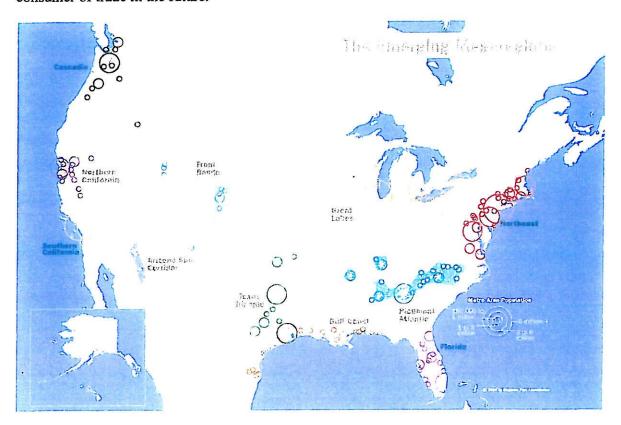

Costs associated with deepening and widening deep-draft harbors

The Harbor Maintenance Tax (HMT) generates the annual revenues required to keep ports of commerce at authorized dimensions, but since this tax was instituted in 1986, it has seldom been sufficiently utilized for its intended purpose, but rather misappropriated to unrelated programs while our channels and harbors remain neglected. Reports indicate that American's federal navigation channels operate at their authorized dimensions less than 35 percent of the time. The resulting restrictions to vessel transit and tidal delays cost American shippers millions of dollars daily and countless hours of delay, which severely diminish the opportunity for domestic economic growth and job creation.

While this under-investment in our ports and harbors continues to occur on an annual basis, the Harbor Maintenance Trust Fund (HMTF) is nearing \$7 billion in surplus funds, with incoming annual revenues of approximately \$1.5 billion. Yet last year, less than \$800 million was allocated to annual dredging and related maintenance projects. Continuing this trend will yield increased transportation costs, higher prices on imported goods, and reduced demand for U.S. exports. As a nation, we cannot afford to overlook the economic opportunities created by our ports and harbors. Without adequate investment in these key economic engines, our global standing will continue to decline.

Current and projected population trends that distinguish regional ports and ports that are immediately adjacent to population centers

According to recent studies, population and economic growth in the United States are continuing to shift to the south and west. The arc of southern states from Virginia to Texas accounts for 36 percent of the U.S. population today, and is expected to account for about one half of all growth during the next 50 years. The U.S. economy is increasingly driven by 10 to 12 megaregions of interconnected urban areas, with four megaregions located in the south. This region will become a more significant producer and consumer of trade in the future.

Historically, growth in distribution, warehousing, and logistics-related services has centered around key population and consumption centers. Areas with projected population growth and a higher concentration of younger families tend to be attractive to planned distribution center growth, as these areas represent growing retail markets. According to the Demographic Estimating Conference Database, Florida's population is anticipated to grow to 23.8 million people by 2030, which equates to a 1.2 percent annual growth rate over the 20-year period.

Ability of waterways and ports to enhance export initiatives benefitting the agricultural and manufacturing sectors

The U.S. economy will continue its shift to services, information and technology as key sources of jobs. Even with a decline in manufacturing jobs, productivity gains will increase in manufacturing output and generate more freight. The U.S. will look to other nations as markets for agricultural and manufactured goods – particularly technology products – as well as sources of raw materials and basic manufactured goods.

Seaports in the U.S. are faced with increasing volumes of international freight being shipped in intermodal-transport containers. These southern Gulf and East Coast ports are particularly blessed with most of the freight that originates in western Asia, Africa and Europe. However, with the growth in vessel capacity from 4,500 TEUs to over 12,000 TEUs, increasingly larger ships transiting domestic and international waters require maintenance dredging and expansion of deep draft navigation channels — an escalating concern for U.S. ports and the customers they serve.

Seaports desiring to serve the largest ships transiting the Panama Canal must provide navigation channels with 50 feet of depth. Only one U.S. Atlantic Coast seaport – Norfolk -- has at least 50 foot depth for both its channel and berths today. PortMiami has federal authorization to reach this depth and has, in fact, begun to dredge, with costs borne by state, local and private entities. In spite of Miami's authorization and opportunity, the federal government has chosen not to participate in assisting a U.S. port in competing for a market share of global trade.

The constantly developing global marketplace demands that U.S. producers be able to reach consumers around the world in the most efficient, lowest cost manner possible. Regrettably, in part due to the underfunding of maintenance dredging and constraints on modernization of harbor channels, Florida and other east coast states are being denied the full opportunities of the job growth that can come through international trade.

Newer, larger ships serving world commerce offer significantly lower operating costs and decreased environmental impact as more goods can be carried on fewer ships with more modern operating technologies. However, if these ships cannot access U.S. ports, this country stands to forgo the benefits of larger vessels and to lose jobs and other economic opportunities to other countries prepared to accommodate them.

Economic Impact of Freight and Seaports

Total U.S. freight volumes are projected to grow from 18.6 billion tons in 2007 to 27.1 billion tons in 2040, or about 1.2 percent per year. The value of freight will grow 2.7 percent per year during this period, reflecting more rapid growth in high value cargo typically carried in containers.

After the 1960s, international trade grew, exceeding 24 percent of the U.S. economy today. The combined value of U.S. imports and exports is expected to quadruple by 2035, reaching 55 percent of gross domestic product.

Public ports throughout the U.S. contribute substantially to their local, regional and national economies. In fact, according to the American Association of Port Authorities, "commercial port activities in 2007 created employment opportunities for more than 13.3 million Americans, including nearly 12 million who were employed in exporter/importer-related businesses and support industries throughout the United States. Business activities related to waterborne commerce contributed approximately \$3.5 trillion overall to the U.S. Economy and those same businesses paid nearly \$212.5 billion in federal, state and local taxes. Seaport activities alone, in 2007, accounted for \$31.2 billion in federal, state, and local tax revenues. Jobs created by exports pay 13-17 percent higher wages than non-trade jobs in the economy (\$49,000 a year on average for port-related jobs in 2007, compared to \$37,000 on average for all U.S. workers)."

In conclusion, we would like you to consider the bold new agenda created by Florida Governor Rick Scott, which highlights the need to invest in our seaports in preparation for the expansion of the Panama Canal, the recently ratified free trade agreements and the growing economies of Central and South America. There is also a need for potential private investment opportunities to improve transportation connections to and from Florida's ports. Florida is making the investment in our ports in order to create long lasting economic opportunities for our state. We need the federal government to do its part by dedicating the needed resources to this country's critical commerce-related infrastructure. Anything less than this undermines the competitive advantage, the economic stability and the potential job creation afforded by growth in international trade.

The U.S. Port and Inland Waterways Modernization Strategy initiative undertaken by the ACOE is critical to our country. We appreciate your efforts and the opportunity to comment and provide input. We look forward to the efficiencies and innovations this report will identify, both internally and externally, and the implementation that will surely follow. Please keep us apprised of your progress.

Sincerely,

Doug Wheeler

RICK SCOTT GOVERNOR

605 Suwannee Street Tallahassee, FL 32399-0450 April 3, 2012

ANANTH PRASAD, P.E. SECRETARY

Hal Cardwell, Ph.D. Shared Vision Planning Institute for Water Resources, USACE 7701 Telegraph Road Alexandria, VA 22315

Dear Dr. Cardwell:

In today's global economy, trade and logistics are critical components of our nation's economy and are critical to improving Florida's quality of life. Florida - with 14 deepwater ports, three major railroads, and more than 12,000 miles of highways - stands to be at the center of the growing business in trade and freight movement. Further, with the expansion of the Panama Canal to be completed in 2014, Florida will be a leading trade and logistics hub for the United States by capitalizing on the booming economies in Central and South American and the growing East-West trade routes. Florida well understands the importance of seaport and waterway investments, and I am writing to support the U.S. Port and Inland Waterways Modernization Strategy report which will investigate these issues.

Demonstrating the importance of freight mobility to the Florida economy, the Florida Department of Transportation (FDOT) recently created the Office of Freight, Logistics and Passenger Operations. This office will be developing a Freight Plan for the state, as we continue to conduct associated studies in Florida that address the factors you are considering on a national level. These studies will include the costs and return on investment associated with deepening and widening deep-draft harbors, the ability of Florida waterways and ports to enhance the nation's export initiatives and the impact of current and projected population trends on Florida port growth.

Two studies completed in 2010 outline the value of and expected growth in our seaports and international trade. You can find both the Florida Seaport System Plan and the Florida Chamber Foundation's Trade and Logistics Study at: http://www.dot.state.fl.us/seaport/publications.shtm.

The Department's commitment to the ports as economic engines for the region and the state is demonstrated in a recent article written by FDOT Secretary Prasad for the James Madison Institute (attached). In order for the State to grow, prosper and continue to create the conditions to improve our economy and produce high-paying jobs, Florida must continue to have the best transportation and intermodal infrastructure system in the nation. Governor Scott and the Department are committed to making the investments in our State's transportation system that will reduce the barriers for shippers and logistics firms to move freight throughout Florida, as well as continuing to improve passenger operations and Floridians quality of life.

Thank you for this opportunity to comment and I encourage you to contact my staff should you need more details or wish to ask questions about Florida's seaport program.

Sincerel

Doug Wheeler, President

April 5, 2012

Mr. Matthew Chase Executive Director NADO and NADO Research Foundation 400 N. Capitol Street, NW, Suite 390 Washington, DC 20001

Dear Mr. Chase:

We are writing you today after reading the "Freight Transportation and Economic Development: Planning for the Panama Canal Expansion" document published by the National Association of Development Organizations (NADO) Research Foundation on March 16, 2012. This document contains outstanding research and information – with one major exception, there is no mention of Florida in the document.

Florida, under the current leadership of Governor Rick Scott, is well on its way to achieving the recommendations listed on page 15 of your document. PortMiami is the only east coast seaport south of Virginia *authorized* to dredge to 50-feet, and rather than wait for the federal government to pay for this federally approved dredge, the Governor and the Florida Legislature provided most of the necessary funding last year. The Florida Department of Transportation is working with international businesses, modal partners and others to continually update a freight and logistics investment plan for the future of Florida.

As your document correctly points out, new cargo transportation patterns have impacted every state and regional development organization in the country. The Port of Jacksonville, Port Everglades, and PortMiami already receive and off-load Post-Panamax size vessels (under tidal and load restrictions) coming through the Suez Canal. Florida, the largest Southeastern state and the peninsula of the U.S. in the Caribbean, has been working to build a global hub for trade, logistics, and export-oriented manufacturing. In addition, Florida seaports have already begun projects to increase capacity – such as a truck-freight tunnel at PortMiami, developing intermodal logistics facilities at Port Everglades and the Port of Jacksonville, expanding on-dock rail capacity at several seaports including the Port of Tampa, and many others.

Florida enjoys a positive trade balance of exports over imports (Florida is the 4th largest exporting state in the U.S.), and has 20 free trade zones located around the longest shore line in the continental U.S. Florida is the only state to have water access to both Gulf and Atlantic shipping routes, making the lack of any mention of seaports in Florida in either the discussion of "Emerging Logistics Clusters in the Southeast" or the "Inland and Gulf Coast Preparations, a glaring omission."

Succinctly put, Florida's freight mobility planning and investments are well underway and too numerous to simply cite in this letter. In fact, many of the assessments recommended in your publication have already been completed in Florida. We invite you to take the opportunity to visit the Sunshine State seaports on either the Atlantic or Gulf Coast to learn more about their projects to enhance capacity and connectivity. In the meantime, we encourage you to visit our website at www.flaports.org, which contains a wealth of information regarding trade, logistics and planning, as well as many other resources you might find helpful.

We look forward to being included in your next publication on freight transportation in the U.S. If you have any questions or comments, please do not hesitate to call or write.

Doug Wheeler

summary of meetings2.docx; dear conferees.docx

Good afternoon. The following is a report on the Coalition for America's Gateways and Trade Corridor's (CAGTC) Annual Conference in Washington, D.C. last week, (summary attached), and a few other matters that may be of interest to you.

CAGTC ANNUAL CONFERENCE

The theme of the meeting was "Don't Leave Our Freight System to Chance." Each year the annual meeting tacitly highlights one of the freight modes within the speaker topics. This year, seaports were highlight and two of the very first speakers were Janice Hahn (D-CA) and Ted Poe (R-TX), Co-Chairs of the PORTS Caucus. The Caucus was created in recognition of the vital role our ports play in the preservation of the nation's economy and national security. Their mission is to promote a dialog and coordination between Congress, the Administration and relevant federal agencies, as well as important industry officials. At this point, five Florida Congressional delegation members are represented on the Caucus and while in D.C., we had the opportunity to meet with staff of several more members and encourage them to join the Caucus.

Please contact me if you have questions or would like to hear more about the CAGTC Conference.

CALL TO ACTION ON PNRS

Yesterday House Conferees made their first formal policy offer during closed-door negotiations. The offer related to the Highway Safety Improvement Program and the emergency relief program; it is now up to Senate conferees to accept, reject or counter the offer. The House is scheduled to hold two votes tonight on motions to instruct House conferees on H.R. 4348 (Transportation Authorization Extension Bill):

- 1. Motion made by Transportation and Infrastructure Ranking Member Nick Rahall (D-WV) instructing House conferees to accept certain portions of the Buy America provisions of the Senate bill.
- Motion made by Rep. John Barrow (D-GA) instructing House conferees to "insist on" the House-passed Keystone XL pipeline provisions of H.R. 4348.

Though we are not sure when, we anticipate another very important issue will be coming up in conference negotiations in the near future: Funding for Projects of National and Regional Significance (PNRS). Productivity growth in freight transportation has long been a driving force for the growth of U.S. overall productivity and contributed directly to the growth of the U.S. GDP, and yet, the necessary resources for the safe and efficient movement of freight has not been adequately addressed. Maintaining the competitive and merit-based PNRS program addressed by MAP-21 will help strengthen nationally-vital transportation projects, improve U.S. productivity, and increase our global competitiveness.

We feel that it would be beneficial for additional (non-conferee) members of the House & Senate to sign on to a bicameral "Dear Conferee" letter in support of PNRS (sample letter attached). If you are in agreement, please ask your Members of Congress from the House and Senate (that are non-conferees) to sign on to this letter in support of PNRS. There are no Florida members signed on to the letter to date. The Congressional offices championing this effort would like to transmit the letter to bill conferees tomorrow. Please note that bill conferees should not be approached to sign this letter. The Florida Members of Congress who are conferees are: Senator Bill Nelson, Rep. John Mica, Rep. Steve Southerland, and Rep. Corrine Brown. For a full list of conferees, click here: T:\MyFiles\CAGTC\2012\conferees.docx

If you'd like to speak directly with any of the offices coordinating this letter, the appropriate contacts are: Nick Semanko (Senator Whitehouse): Nicholas Semanko@whitehouse.senate.gov / 202-224-2921 Angela Crowley-Koch (Senator Merkley): Angela Crowley Koch@merkley.senate.gov / 202-224-3753 Jacob Olson(Rep. Geoff Davis) Jacob.Olson@mail.house.gov / 202-225-3465 Paul Hoover (Rep. Adam Smith): paul.hoover@mail.house.gov / 202-225-8901

The Members that have signed onto the letter are:

House

Dold (R-IL) – Considering; will most likely sign on Lipinski (D-IL) – Considering; will most likely sign on

Napolitano (D-CA)

Schiff (D-CA)

Richardson (D-CA)

Dicks (D-WA)

Sires (D-NJ)

Smith (D-WA)

Davis (R-KY)

Senate

Whitehouse (D-RI)

Merkley (D-OR)

FPC FEDERAL PLAN OF ACTION

Finally, we continue to identify critical issues and partners to increase the engagement of Florida Seaports at the federal level, including advocacy and outreach efforts, with elected officials, agencies and industry partners. We will be working with the Legislative Committee Chairman, Paul Anderson, between now and the June FPC meeting to continue developing tactics that will be expedient to our objectives. We welcome input and look forward to a good discussion on this topic.

Please give us a call with any questions or suggestions.

Thank you,
Toy Keller

COALITION OF AMERICAS GATEWAYS AND TRADE CORRIDORS

ANNUAL MEETING

May 9 - 10 2012

May 9

Keynote Address by **Victor Mendez**, US DOT Federal Highway Administration: Noted that there is no bipartisanship surrounding the transportation reauthorization issue, but obvious common themes between parties. Highlighted *New York Times* article that reported on freight travel times from LA to Chicago: 48 hours to cross the country; 30 hours to get through the city of Chicago. The Surface Transportation Authorization Bill Conference began on May 8th; bill expires on June 30 and has been extended nine times. 18 billion tons of freight was moved in 2011; 20 billion tons are projected to be moved in 2040. Corridors must be identified for the country's goal of doubling exports by 2016. 30,000+ miles may be designated as Corridors of National Significance. The application response for TIGER IV grants – 703 projects totaling in excess of \$10B, for \$500M in available funds – shows the enormity of the issue. The current Senate Version of the STA bill creates a National Freight Policy Office; \$2B in funds to states; and, designation of projects of National and Regional Significance.

Congresswoman Janice Hahn (D-CA), together with Congressman Ted Poe (R-TX) have formed the PORTS (Ports Opportunity, Renewal, Trade, and Security) Caucus whose goal is to keep US Ports competitive, global and job creating. Hahn pointed out the need for infrastructure investments to be focused on seaports. She is meeting with USDOT Secretary Ray LaHood next month to talk with him about seaports and the need for a National Freight Policy. She and Congressman Poe sent a letter to STA Conferees to ask for such a policy. They are focusing on at-grade crossings, congestion relief, emissions, and off-peak goods movement.

Congressman Poe said the desire of the PORTS Caucus is to ratchet up the issue of trade through seaports and how this impacts our economy. They will target a one mile congestion zone around the ports and the HMTF, making sure those funds are spent for the purpose they were collected.

<u>Note</u>: The Florida Ports Council recently sent a letter to Florida's congressional delegation members asking them to join the PORTS Caucus. To date, the following members have joined:

Allen West Alcee Hastings Cathy Castor Dennis Ross

Ileana Ros-Lehtinen

A moderated panel of four transportation industry representatives debated the pros and cons of implementing a freight fee. Some said a national solution was needed; others said the states or private sector should solve the problem. Many different funding options to pay for transportation infrastructure were discussed. Most agreed that any plausible funding solution will most likely include the combination of a number of sources, including the use of TIFIA funding to advance critical projects and serve to bridge the funding gap.

Senate keynote remarks were made concerning freight and the 112th Congress, by Senator Barbara Boxer (D-CA). She addressed the Coalition saying the Senate has found a way to fund transportation for two more years, creating jobs and without raising taxes. The bill, entitled "Map-21," proposes to reduce the number of Titles from 90 to 30, and move projects through the process more quickly. Both of these provisions are in the House Bill as well, but it has not been passed on the floor and therefore, cannot technically be considered in whole. Map-21 proposes to expand TIFIA, raising the loan limit and allowing projects to be advanced. According to Boxer, this would create three-million jobs. Both bills have added non-transportation issues but according to Boxer, consensus must be reached and she is optimistic.

A second panel discussing the Panama Canal expansion included representatives from CDM Smith, Cambridge Systematics and the National Association of Development Organizations (NADO) which published the Freight Transportation and Economic Development: Planning for the Panama Canal Expansion article to which the FPC responded (see attached letter from FPC to NADO regarding omission of Florida from their research document discussing ports preparing for the Canal expansion).

A panel of Senate staffers was scheduled to discuss building momentum behind the authorization, but, two of the three panelists had to cancel in order to attend the Senate Commerce Committee staff meeting the following day, slated to discuss the bill conference. Tom Lynch of Senator Max Baucus' office and Majority Subcommittee Staff Director, Senate EPW Committee and Jeff Davis with Transportation Weekly, who was slated to moderate the panel, did offer some thoughts. Mr. Lynch observed that the US signed the NAFTA trade agreement but there is no designated route for NAFTA trade. He said a national freight program and "carve out" must be established with greater emphasis on interstate needs. He noted the identification of 30,000 miles of corridors of national significance as a basis for the freight program. He also noted that funding was not available for the (formerly) typical six-year authorization so the proposed transportation bill is currently only a two-year bill. He said since USDOT is implementing the plan, it will take longer than the two-year authorization to build. Mr. Lynch noted that \$5.6 billion is needed to implement the bill, plus a cushion of over \$3 billion. He suggested that funds would have to be transferred from General Revenue into the Highway Trust Fund and then replenished with pension stabilization funds when that is worked out.

FLORIDA CONGRESSIONAL OFFICES VISITED BY FPC:

Congressman Alcee Hastings, Christian Sy,
Congressman Allen West, Taryn Dorfman,
Congresswoman Kathy Castor, Rene Munoz,
Congressman Steve Southerland, Kristin Callaway,
(Congressman's Corrine Brown's Office also was visited but staff was unavailable to meet)

A CAGTC reception was held the evening of May 9 for all members of Congress. The following members attended and delivered comments in support of the Transportation Bill:

Rep. Thomas Petri (R-WI)
Rep. James Lankford (R-OK)
Rep. Peter DeFazio (D-OR)
Rep. Laura Richardson (D-CA)

Rep. Albio Sires (D-NJ) Rep. Grace Napolitano (D-CA)

Rep. Jerrold Nadler (D-NY)

Rep. Eddie Bernice Johnson (D-TX)

Note: Rep. John Mica (R-FL) planned to attend but declined due to the subsequent scheduling of a meeting of the Transportation Bill Conferees.

May 10

Peter Friedmann, FBB Federal Relations, and Jeff Davis, The Legislative Services Group/Transportation Weekly, addressed the question: Will We See a Surface Transportation Authorization in 2012? Mr. Friedmann said neither side is comfortable with the financing, but there is a critical need to get a sustainable, multiyear authorization bill. The current bill is not. Fundamentally, everyone knows what the PROBLEM is but no one is offering a SOLUTION. He suggested that the transportation industry and CAGTC need to:

- 1. Define the problem (we don't need another study)
- 2. Propose a solution with details and legislative language

Jeff Davis agreed, adding that the internal and external politics must be mapped out too. He said the RAMP Act (Realize America's Maritime Promise) is now toothless because the Coalition did not have a handle on how the act would affect the budget (there is a 40% cost share so \$2B is needed to get \$800M to spend) and the internal politics. Mr. Davis said the Tea Party Republicans are asking three questions before moving on any bill:

- 1. Is this a problem?
- 2. Is this a problem best addressed by government?
- 3. Is the federal government the right government to address the problem?

Staff is trying to figure out what portions of HR 7 need to go into the Senate Bill, Map-21. The House and Senate are rarely in town together at the same time until June and decisions need to be made by the first week in June. According to Mr. Davis, this is an ambitious time frame even if the bills were similar; both bills have extraneous issues with which to be dealt. He said that during a lame duck session MAJOR issues include:

- 1. 2001 and 2003 tax cut renewal
- 2. Extension of payroll taxes
- 3. 13 appropriations bills
- 4. Medicare expiration
- 5. Debt ceiling vote
- 6. \$1.3 trillion in debt implications excluding appropriations (\$2.4T with projected additions)

Mr. Davis noted that it may be easier to get bills that include funding passed near the end of June or beginning of July because primaries will be over and members will be more willing to vote for funding solutions. He also noted that freight is not this administration's priority.

CAGTC will be meeting with freight stakeholder groups to discuss these issues. It was noted that there are a lot of representative groups but only CAGTC brings them all together.

Jack Basso, AASHTO, discussed implications of the Congressional Budget Office's Highway Trust Fund baseline projections. He said we are currently meeting only 1/3 of the \$200B required each year to maintain and improve the nation's transportation system. We have invested about \$90B, or 65% less than needed annually for the past 20 years. Mr. Basso noted that the administration's surface transportation budget is \$550B with no revenue options and no support for an increase in the gas tax. He said VMT was

down significantly from 2007, but is now starting to creep up again. 2013 predictions are that the Highway Trust Fund would only have \$8.1B available to be able to operate within the revenue budget (opposed to the \$39B currently authorized in Map-21). This would be a disaster for our county. According to Mr. Basso, Congress has two options: 1. Let it just happen; or 2. Pass an extension with the pay forwards in Map-21, which is very controversial. Interestingly, according to Mr. Basso, the policies in HR 7 and Map-21 are about 90% alike – it is the funding that creates controversy.

Mr. Basso said the CBO projections for highway are showing a \$4.6B deficit by 2013; \$90.6B by 2022. Transit will be at a \$1.2B deficit by 2014; \$35.2B in 2022. He said that AASHTO had produced a matrix of how TRILLIONS could be raised. Possible source categories include direct revenue (variety of transportation user fees and general tax revenues, base on VMT vs. gas tax); bonding and credit programs (tolls and special taxes); public/private partnerships.

In conclusion, Mr. Basso said it will take three steps to pass the STA bill: find an offset to pay for a two-year bill (Map-21 does this); find an acceptable source to pay for a six-year bill; and adopt policies that are in keeping with a flexible, affordable bill.

Mario Cordero, Commissioner, U.S. Federal Maritime Commission, highlighted a case study of transportation infrastructure using the Desmond Bridge in Long Beach, CA as an example.

2000 - State decided to replace the outdated, structurally compromised bridge

2004 - \$650M estimate

2006 - \$750M estimate

2010 - \$1.1B estimate

2012-2016 Construction timeframe

Cost of environmental studies: \$2M

Trade in the U.S. is \$2 Trillion. US Port infrastructure ranks 23rd in the world; Airport infrastructure is ranked 31st in the world; Highways rank 20th. Today we are just trying to keep up with 46,000 miles of highway and funding is not available to address adding needed infrastructure. The 1993 8.3 cent gas tax adjusted for inflation would be 29 cents today. China is a growing threat to the US's place of trade prominence in a global economy.

Congressman Ted Poe (R-TX) Founder and Co-Chair

Congresswoman Janice Hahn (D-CA) Founder and Co-Chair

Congressional PORTS Caucus

Ports Opportunity, Renewal, Trade, and Security

Congressman Ted Poe (R-TX) and Congresswoman Janice Hahn (D-CA) recently announced the formation of the bipartisan Congressional Ports Opportunity, Renewal, Trade, and Security (PORTS) Caucus. The Caucus was created in recognition of the vital role our ports play to the preservation of our nation's economy and national security.

Mission of the Caucus

The Caucus' mission will be to promote the importance of our ports to the nation's economy and the need to secure them by promoting dialogue and coordination between Congress, the Administration and relevant federal agencies, as well as important industry officials.

Why Ports are Important to the United States

Ports create jobs, economic growth, and opportunity. United States ports support 13.3 million jobs and account for \$3.15 trillion in business activity to the economy. Every congressional district in the country is dependent on U.S. ports, from the products on store shelves to the technology in our living rooms. Ports allow businesses, large and small, access to markets around the world and the opportunity to grow and create new American jobs.

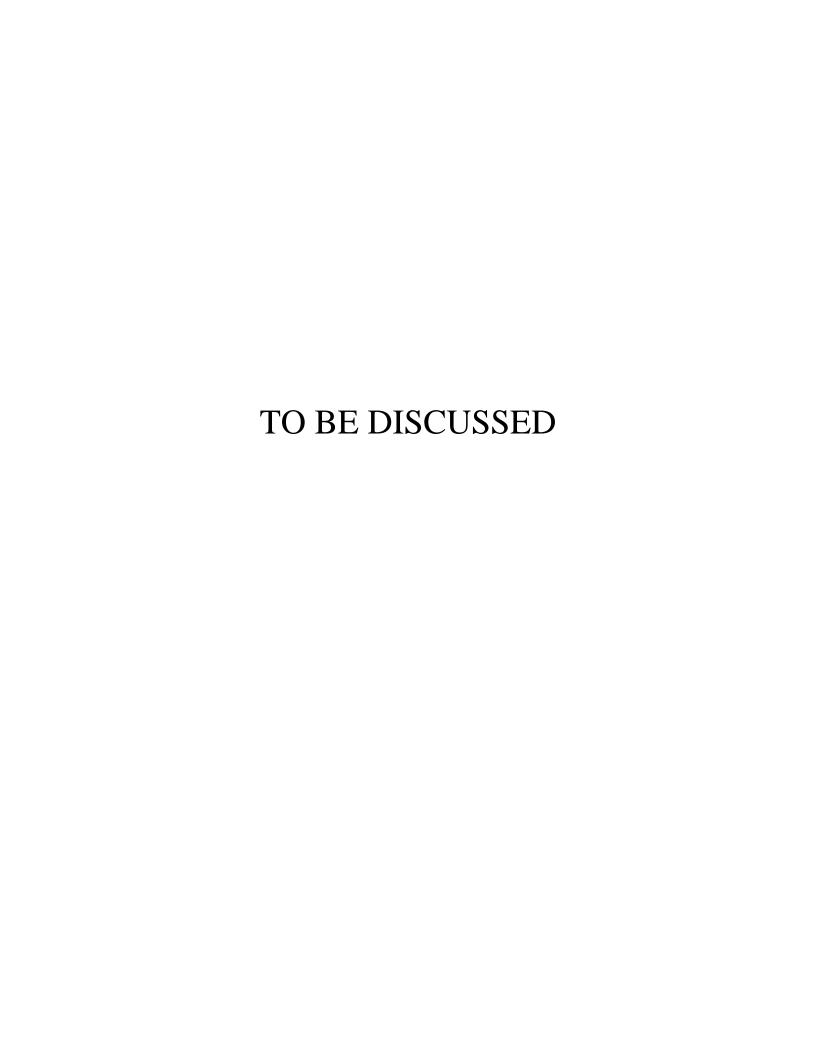

The United States is served by more than 350 commercial sea and river ports that support 3,200 cargo and passenger handling facilities. Each day, United States ports move both imports and exports totaling some \$3.8 billion worth of goods through all 50 states. Additionally, ports move 99.4 percent of overseas cargo volume by weight and generate \$3.95 trillion in international trade. Given the importance of ports to our national economy, they must remain competitive and secure.

Caucus Members

The Caucus is composed of Members from all regions of the country, including Representatives: **Ted Poe (TX), Janice Hahn (CA)**, Adam Smith (WA), Jesse Jackson Jr. (IL), Bennie Thompson (CA), Bob Filner (CA), Ileana Ros-Lehtinen (FL), Blake Farenthold (TX), Henry Waxman (CA), Charles Boustany (LA), Kathy Castor (FL), Sheila Jackson Lee (TX), George Miller (CA), Bill Cassidy (LA), Colleen Hanabusa (HI), Russ Carnahan (MO), Cedric Richmond (LA), Allen West (FL), Silvestre Reyes (TX), Bill Keating (MA), Hank Johnson (GA), Tim Scott (SC), John Barrow (GA), Steve Palazzo (MS), Albio Sires (NJ), Barbara Lee (CA), Stephen Lynch (MA), Mike McIntyre (NC), Bobby Scott (VA), Lucille Roybal-Allard (CA), Pete Olson (TX), Gregorio Kilili Camacho Sablan (Northern Mariana Islands), Dennis Kucinich (OH), Marsha Blackburn (TN), Dennis Ross (FL), Candice Miller (MI), Peter DeFazio (OR), Duncan Hunter (CA), Gary Miller (CA), Grace Napolitano (CA), Susan Davis (CA), Linda Sanchez (CA), Michael McCaul (TX), Donna Christensen (USVI), Joe Walsh (IL), Gene Green (TX), Jerry McNerney (CA), Pete Stark (CA), Brian Bilbray (CA), Louise Slaughter (NY), Charlie Rangel (NY).

TAB 6 AGENCY REPORTS

TAB 6A FLORIDA DEPARTMENT OF TRANSPORTATION

TAB 6B FLORIDA DEPARTMENT OF ECONOMIC OPPORTUNITY – LAND PLANNING

Broadly speaking, the Department of Economic Opportunity, <u>Bureau of Community Planning</u> is responsible for four initiatives that are of importance to deepwater ports, as follows:

- 1.) Comprehensive Planning The Bureau of Community Planning reviews amendments to local government comprehensive plans. The 2011 Legislature made many changes to the Community Planning Act, which is found in Chapter 163, Florida Statues. The most important changes are to the manner in which the amendments are reviewed. For most types of proposed amendments the comments from state and regional agencies will now come directly from the review agencies without the delay of funneling them through the State Land Planning Agency. This will reduce the review time for comprehensive plan amendments by half. Secondly, comments from state and regional agencies are clearly defined in the statute allowing the agencies to focus their reviews on adverse impacts to important state resources and facilities. The revised law in the end empowers local governments to address local issues, while retaining a role for the State if significant state resources or facilities are adversely impacted.
 - Importance to Ports Florida's deepwater ports exist in the larger context of their surrounding communities. If a local government proposed a comprehensive plan amendment that adversely impacted one of Florida's deepwater ports, the State would have the authority to challenge that amendment.
- 2.) Areas of Critical State Concern The Areas of Critical State Concern Program provides planning and regulatory oversight for areas containing natural resources of statewide significance. It protects resources and public facilities of major statewide significance. Designated areas of critical state concern are the City of Apalachicola (Franklin County), the City of Key West and the Florida Keys (Monroe County), the Green Swamp (portions of Polk and Lake counties), and the Big Cypress Swamp (Collier County). The Department reviews all local development projects within the designated areas and may appeal to the Administration Commission any local development orders that are inconsistent with state guidelines.
 - Importance to Ports This program affects the Port of Key West since it is in an Area of Critical State Concern. None of the other ports are in an Area of Critical State Concern.
- 3.) Developments of Regional Impact A Development of Regional Impact is a development which, because of its character, magnitude, or location, would have a substantial effect upon the health, safety, or welfare of citizens of more than one county. The Developments of Regional Impact Program provides a process to identify regional impacts stemming from large developments and appropriate provisions to mitigate these impacts. The Bureau of Community Planning provides staff support to the DRI program throughout the State.
 - Importance to Ports Some of Florida's deepwater ports contain or are in DRIs. The DRI program is critical to these ports and their ability to be served by adequate infrastructure.

- 4.) Technical Assistance The Bureau of Community Planning staff provides technical assistance to help businesses, citizens, and local governments understand a variety of land use planning topics including post-disaster redevelopment, coastal high hazard areas, the impact of sea level rise, the Waterfronts Florida program, transportation planning, land use compatibility adjacent to military bases and public airports, and many other issues.
 - Importance to Ports Many of the technical assistance issues noted above are of interest to deepwater port staffs, neighbors, customers, and elected officials. The Bureau of Community Planning serves as an information clearinghouse on land use issues that impact ports.

Finally, for inclusion in the FSTED Council meeting materials, attached is a one page summary of those citations from the Florida Statutes that pertain to deepwater ports and land use planning.

Florida Statutes: Local Government Comprehensive Planning and Deepwater Ports

In terms of local government comprehensive planning, there are four primary references to deepwater ports in the Florida Statutes, as summarized below.

- 1. Section 163.3177(6)(b), Florida Statutes, identifies different levels of transportation analysis that must be included in a local government's comprehensive plan, based on the size and location of the local government. If the local government is in the planning area of a Metropolitan Planning Organization, then Section 163.3177(6)(b)2.b, Florida Statutes, indicates that the comprehensive plan must address "...seaport facilities, access to those facilities, and intermodal terminals." Section 163.3177(6)(b)3.b, Florida Statutes, also notes that cities greater than 50,000 persons and counties greater than 75,000 persons must address "Plans for port... and related facilities coordinated with the general circulation and transportation element." Some or all of these requirements can be addressed in the port master plan.
- 2. Section 163.3177(6)(g)8, Florida Statutes, requires that the comprehensive plan's coastal management element must "Direct the orderly development, maintenance, and use of ports identified in s. 403.021(9) to facilitate deepwater commercial navigation and other related activities." This requirement can be addressed in the port master plan.
- 3. Section 163.3178(2)(k), Florida Statutes, requires port master plans to be included in the local government's coastal management element. It notes that port master plans must identify existing port facilities and any proposed expansions. To the extent that they are applicable, port master plans must also address the following requirements:
 - a. Provide a land use and inventory map of existing coastal uses;
 - b. Analyze the environmental, socioeconomic, and fiscal impact of development;
 - c. Analyze effects of existing drainage systems on estuarine water quality;
 - d. Outline principles for hazard mitigation and protection of human life;
 - e. Outline principles for protecting existing beach and dune systems;
 - f. Outline principles to eliminate inappropriate and unsafe development;
 - g. Identify public access to shoreline areas and preservation of working waterfronts;
 - h. Designate coastal high-hazard areas and mitigation criteria;
 - i. Outline principles to assure that public facilities will be in place; and,
 - j. Mitigate the threat to human life and protect the coastal environment.
- 4. Section 163.3178(3), Florida Statutes, identifies eligible port projects both on the port and within 3 miles of the port that are not considered to be Developments of Regional Impact if they are consistent with a port master plan that is in compliance with Section 163.3178(2)(k), Florida Statutes.

TAB 6C DEPARTMENT OF ECONOMIC OPPORTUNITY – STRATEGIC BUSINESS DEVELOPMENT

Statewide Strategic Plan

June 22, 2012

The Draft Plan

- Vision Top performing economy and best place to live, learn, work, and do business
- 3 Goals Global competitiveness, top economy, and quality of life

Four Cross-Cutting Strategies

- Collaboration & Alignment State, regional, and local
- Regional Industry Clusters
 Best practices
- Global Hub
 Trade, visitors, talent, innovation, & investment
- Megaregion Connect economic development, talent, infrastructure, partnerships, etc.

6 Pillars with 23 Strategies

Talent Supply and Education

Lead the nation in market-related student performance and workforce skills

Innovation and Economic Development

Diversify Florida's economy and position for growth in national and global markets

Infrastructure and Growth Leadership

Modernize Florida's infrastructure to support competitive business and a high quality of life

6 Pillars with 23 Strategies

Business Climate and Competitiveness

Provide the nation's leading business climate and customer-focused business support services

Civic and Governance Systems

Create strong partnerships to meet economic development goals

Quality of Life and Quality Places

Provide the nation's leading communities of choice to live, learn, work, and play

Next Steps

- Review draft with partners (May)
- Develop metrics (May June)
- Provide for public comment (June)
- Adopt Plan (July)
- Develop tactical and business plans for implementation (July ⇒)

Developing the Florida Five Year Strategic Direction – REVIEW DRAFT V1.4 (6/12/2012) Statewide Strategic Plan Core Components At-A-Glance

"First Round" Statements and Strategies for the Five Year Statewide Strategic Plan for Economic Development - At-A-Glance

 Florida will have the nation's top performing economy and be recognized as the world's best place to live, learn, work and do business. Vision

• Lead the nation in global competitiveness as a location for business, investment, talent, innovation and visitors. Goals

Become the nation's top performing economy.

Lead the nation in quality of life.

Objectives S Create more jobs. Grow businesses.

Get Floridians back to work.Expand global commerce.

 Increase the competitiveness of Florida's regions. • Foster opportunities for prosperity.

Cross Cutting Strategies

Improve collaboration and alignment among state, regional and local entities toward the state's economic vision.

Develop and implement a statewide strategy to develop regional industry clusters using global best practices.

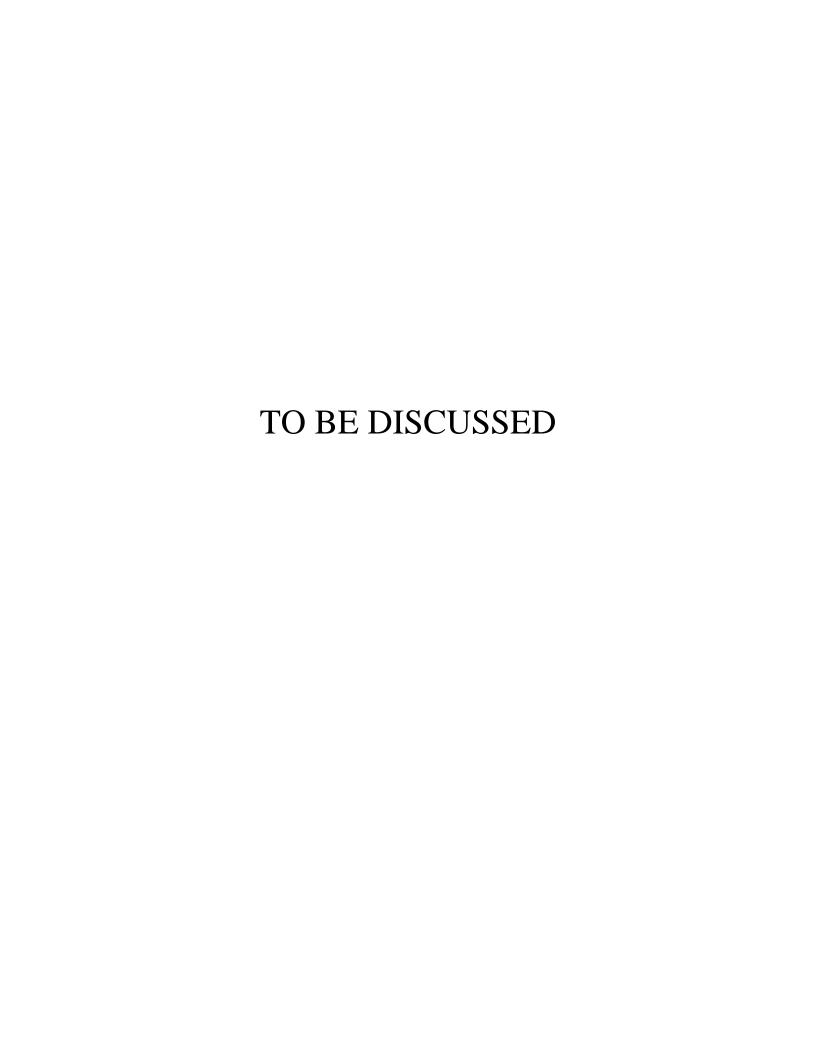

તં

Position Florida as a global hub for trade, visitors, talent, innovation and investment.

Connect economic development, talent, infrastructure, partnerships and other resources across regions to build Florida as a globally competitive megaregion.

| | | Area-Specific Strategies | | | |
|---|---|--|--|--|---|
| Talent Supply & Education | Innovation & Economic Development | Infrastructure & Growth Leadership | Business Climate & Competitiveness | Civic & Governance Systems | Quality of Life & Quality Places |
| 5. Connect and align education and workforce development programs to develop and retain Florida's current and future talent supply chain and meet employer needs. 6. Develop an integrated pre-K through career education system to prepare students for work. 7. Position Florida as a leader in science, technology, engineering, and mathematics (STEM) research, education and market-relevant technical skills. 8. Expand access to education and training programs for talent in distressed markets (e.g., rural, urban core). | eadership in expanding and emerging industry clusters and help transition established clusters to serve new markets. 10. Grow, sustain, and integrate efforts related to R&D, technology commercialization, and seed capital to create, nurture and expand innovation businesses. 11. Expand the number of Florida businesses selling goods and services internationally and diversify the markets they serve. 12. Brand and market Florida as the best state for businesse. | 13. Coordinate decision-making and investments for economic development, land use, infrastructure, water, energy, natural resources, workforce and community development at the statewide, regional and local levels. 14. Develop and maintain multimodal, interconnected trade and transportation systems to support a prosperous, globally competitive economy. 15. Develop and maintain a cutting-edge telecommunications infrastructure. 16. Ensure the future supply and quality of water to meet Florida's economic and quality of life goals. 17. Develop and maintain diverse, reliable, and cost effective energy sources and systems to meet Florida's economic and environmental goals. | 18. Renovate permitting, development, and other regulatory processes to meet changing business needs and provide a predictable legal and regulatory environment. 19. Ensure state, regional and local agencies provide collaborative, seamless, consistent and timely customer service to businesses. 20. Expand opportunities for access to capital for businesses throughout their life cycle. 21. Reduce barriers to small business and entrepreneurial growth. 22. Develop a government revenue structure that encourages business growth and development. | 23. Support and sustain statewide and regional partnerships to accomplish Florida's economic and quality of life goals. 24. Invest in strategic statewide and regional economic development priorities. | sustain vibrant, healthy communities that attract workers, businesses, residents and visitors. 26. Ensure Florida's environment and quality of life are sustained and enhanced by future growth plans and development decisions. 27. Promote, develop and leverage Florida's natural and cultural assets in a sustainable manner. |

TAB 9 REVIEW OF FSTED PROGRAM PROJECT APPLICATION REVISIONS AND SUBMITTAL SCHEDULE

s. 163.3178(2)(k) or other provisions of the Community Planning Act, part II of chapter 163.

- (4) A port eligible for matching funds under the program may receive a distribution of not more than \$7 million during any 1 calendar year and a distribution of not more than \$30 million during any 5-calendar-year period.
- (4) (5) Any port which receives funding under the program shall institute procedures to ensure that jobs created as a result of the state funding shall be subject to equal opportunity hiring practices in the manner provided in s. 110.112.
- (5)(6) The Department of Transportation may shall subject any project that receives funds pursuant to this section and s. 320.20 to a final audit. The department may adopt rules and perform such other acts as are necessary or convenient to ensure that the final audits are conducted and that any deficiency or questioned costs noted by the audit are resolved.
- Section 5. Subsections (4) through (13) of section 311.09, Florida Statutes, are amended to read:
- 311.09 Florida Seaport Transportation and Economic Development Council.—
- (4) The council shall adopt rules for evaluating projects which may be funded under ss. 311.07 and 320.20. The rules shall provide criteria for evaluating the potential project, including, but not limited to, such factors as consistency with appropriate plans, economic benefit, readiness for construction, noncompetition with other Florida ports, and capacity within the seaport system economic benefit of the project, measured by the potential for the proposed project to maintain or increase cargo

| ff Capacity is checked, then display 'If new capacity | Provide a detailed description of the project. Include location, size/dimensions and purpose of construction or facility, any required mitigation, and all other information needed to gain a comprehensive understanding of the project. The project description must correspond to the current year funding request; that is, if the funding request is part of a larger project, the project description must identify the specific element to be funded in the current year. 2. Please characterize the project as Capacity Maintenance Operations If new capacity, please describe the market this project with attract/serve. | |
| w/text box' | | |
| | 3. Florida's Seaport Mission Plan – Check the specific goals and objectives this project supports: | |
| If Goal is checked, then open associated objectives (see page 5 for complete listing of Goal and Objectives) | Goal 1: Develop world-class cargo and cruise facilities to enhance Florida's Competitiveness in the Global Marketplace Goal 2: Build the system-wide, seamless intermodal facilities Florida's seaports need to move their goods and passengers efficiently and cost effectively Goal 3: Capitalize on increased north-south trade and the opportunities presented by the panama canal expansion to capture more direct all-water service and feeder calls Goal 4: Substantially increase the state's strategic funding partnership with Florida's seaports and develop other funding alternatives so that the seaports can implement vital improvements in a timely manner and meet revenue projections Goal 5: Advocate a statewide economic development program that includes investment in Florida's seaports, major drivers of the state's economic growth and generators of jobs for Florida residents Educate state leaders regarding the positive benefits of infrastructure investments in the seaport transportation systems needed to attract and maintain market share. Implement the findings of the Florida Chamber Foundation's December 2010 Florida Trade and Logistics Study that confirms the job- creating impact of maximizing trade flows through Florida's seaports. Educate state leaders regarding the need to keep landside transportation costs competitive. Continue to develop state policies that help seaports lower land-based transportation service costs. | |
| | 4. For the current funding request, as defined in question #1, please provide the following: | |
| | Estimated Design & Permit Completion Date: 10/31/2009 | |
| | Estimated Construction Start Date: 10/31/2009 | |
| | Estimated Completion Date: | |
| | 5. How will this project achieve the state's, the region's and/or the port's economic development goals? [| |
| | 6. Provide a map that identifies the project location. Link Documents | |

Goal 1: Develop world-class cargo and cruise facilities to enhance Florida's Competitiveness in the Global Marketplace

- Build/expand cargo facilities to meet current and future demand.
- Build/expand cruise facilities to meet current and future demand.
- Improve infrastructure as required at all deepwater seaports.
- Implement maintenance and new dredging in programs and identify appropriate dredged material management sites.
- Acquire land for seaport expansion and development of complementary activities.
- Implement environmental protection/mitigation and man-made/natural hazard mitigation programs as required.
- Encourage timely permitting programs through state and local agencies.

Goal 2: Build the system-wide, seamless intermodal facilities Florida's seaports need to move their goods and passengers efficiently and cost effectively

- Provide/improve direct seaport access to roadway networks.
- Work with governmental agencies to plan and fund strategic intermodal transportation system improvements.
- Enhance seaport-rail connectivity.
- Partner with other modal interests to achieve common goals.

Goal 3: Capitalize on increased north-south trade and the opportunities presented by the panama canal expansion to capture more direct all-water service and feeder calls.

- Continue individual as well as regional promotional efforts in establishing markets.
- Provide leadership through the Florida Seaport Transportation and Economic Development Council, the Florida Ports Council, and other agencies to develop competitive trade policies, including educational efforts at state and national levels.
- Capitalize on opportunities presented by the North American Free Trade Agreement, the Dominican Republic-Central America Free Trade Agreement, and other such agreements with Florida's major trading partners.
- Ensure that Florida's seaports are positioned to capture a sizeable share of trade generated by an open Cuban market.

Goal 4: Substantially increase the state's strategic funding partnership with Florida's seaports and develop other funding alternatives so that the seaports can implement vital improvements in a timely manner and meet revenue projections.

- Increase seaport revenue streams by expanding port potentials and diversifying into profitable complementary activities where appropriate.
- Develop and maintain an adequate source of state and federal matching funds for seaport projects.
- Develop and maintain adequate sources of local government financing for seaport projects.

Goal 5: Advocate a statewide economic development program that includes investment in Florida's seaports, major drivers of the state's economic growth and generators of jobs for Florida residents.

- Educate state leaders regarding the positive benefits of infrastructure investments in the seaport transportation systems needed to attract and maintain market share.
- Implement the findings of the Florida Chamber Foundation's December 2010 Florida Trade and Logistics Study that confirms the job-creating impact of maximizing trade flows through Florida's seaports.
- -Educate state leaders regarding the need to keep landside transportation costs competitive.
- Continue to develop state policies that help seaports lower land-based transportation service costs.

PROJECT SEAMIST

SAFETY TRAINING & EDUCATION FOR HAZARDOUS MATERIALS WORKERS

For: Workers In the Maritime Industry including: Port and Dock

Personnel, Law Enforcement, and Off-Shore Workers

Contact: Jason Cohen, Project Administrator

Ph: (954) 262-1623 Fax: (954) 262-3806

Email:cohejaso@nova.edu www.nova.edu/idep

√ Training is offered several times per year

✓ Call now to guarantee enrollment.

Southeast Area Maritime Industry Safety Training (SEAMIST)

The primary focus of Project SEAMIST is to provide innovative and current health and safety training for workers in the Maritime Industry, including law enforcement, dock and port personnel, off-shore workers, and to those who may have exposure to weapons of mass destruction and/or duties which may involve the clean-up of hazardous waste. This training is timely, invaluable and provided at no direct cost to the participants.

Project SEAMIST
offers
3 Levels of
Training

Hazardous Materials Safety and Security - Awareness (Level 1)

(8 hours of classroom instruction and tabletop activities)

The Awareness course is designed to provide the student with the skills and knowledge to identify and notify appropriate personnel and authorities upon the discovery of a hazardous materials/WMD incident. After completing the Awareness Level Course, the student will be able to:

- Describe the role of the awareness level personnel in a hazardous materials/WMD incident and identify related training requirements.
- Identify and describe the important laws, standards and regulations that apply to hazardous materials/WMD initial response.
- Identify the hazard class and, if possible, the product name of hazardous materials/WMD found at an emergency scene.
- Apply principles and define terminology to ensure personal safety.
- Identify the characteristics which may involve hazardous materials/WMD in terrorist activities.

Hazardous Materials Safety and Security - Operations (Level 2)

(24 hours of classroom instruction including hands-on exercises and activities)

The Operations course is the second in a series of courses designed to provide personnel the knowledge and skills they will need to work safely in an environment which includes hazardous materials. The primary focus of the course is to provide personnel with the knowledge and skills to take defensive actions at a scene involving hazardous materials or hazardous waste and in doing so protect themselves, the public, property, and the environment. Upon successful completion of the Operations Level course, the student will be able to:

- Analyze a hazardous materials/WMD incident to determine the scope of the problem and potential outcomes.
- Plan an initial response to a hazardous materials/WMD incident within the capabilities and competencies of available personnel and personal protective equipment.
- Implement the planned response for a hazardous materials/WMD incident to favorably change the outcomes consistent with the emergency plan and/or standard operating procedures
- Evaluate the progress of the actions taken at a hazardous materials/WMD incident to ensure that the response actions are being met safely, effectively, and efficiently.

Hazardous Materials Safety and Security - Technician (Level 3)

(40 hours of classroom instruction including hands-on exercises and activities)

After the completion of this third course in the series, the student will be able to safely and effectively operate in a hazardous materials environment. This course will focus on developing skills to:

- Analyze a hazardous materials incident and integrate it into a NIMS system
- Plan a response within the capabilities of available personnel and equipment
- Implement the planned response to favorably change the outcomes
- Evaluate the progress of the planned response to ensure response actions are being met safely, effectively, and efficiently
- Terminate the incident

Training funded by the National Institute of Environmental Health Sciences, Grant #U45ES019350

Florida's Ports Can Harness Trade's Job-Creating Power

by Secretary Ananth Prasad
As excerpted from The Journal of the James Madison Institute, Winter 2012

In today's global economy, trade and logistics are critical components of our nation's economy and quality of life. Florida, with 14 deepwater ports, three major railroads, and more than 12,000 miles of highways, stands to be at the center of the growing business in trade and freight movement.

Our state's ports are economic engines not just for their respective cities and counties but, indeed, the entire region and state. For example, JAXPORT supports and diversifies the economy in Jacksonville and throughout Northeast Florida with nearly 65,000 direct and indirect jobs. And in Tampa, the port is responsible for almost 100,000 private sector jobs. Both ports generate billions of dollars of economic activity across their regions.

In August 2011, I unveiled the Florida Transportation Vision for the 21st Century, the state's bold, innovative roadmap for the future. This vision highlights several avenues that the department will explore to advance transportation projects and create the conditions for the private sector to make investments which will create new, high-paying jobs. Using this blueprint, Florida will continue to make investments based on market and private sector demand to create the most advanced and effective transportation system in the country.

Governor Scott's 2012 Job Creation and Economic Growth Agenda highlights the need to invest in Florida's 14 deepwater seaports to prepare for the expansion of the Panama Canal, the recently ratified free trade agreements, and the growing economies of Central and South America. There is also a need for potential private investment opportunities to improve transportation connections to and from Florida's ports, including supporting innovative concepts like integrated logistics centers (ILCs) and inland ports. By working together, we can make a positive impact on Florida's future by capitalizing on the immeasurable potential of our seaport system.

Florida is making the investments in our ports in order to create long lasting economic opportunities for our state. By making these investments and improving access to our ports, we will make it more efficient and attractive for shipping companies to invest in Florida, grow our state's imports and exports, and improve our state's economy.

Just as the Governor is focusing on our seaports in his plan to get Florida back to work, our seaport system is a key element in my vision for the Florida Department of Transportation (FDOT). Under my leadership, the department will continue to work in partnership with Florida's seaports in order to aggressively pursue new private sector investment and more freight and cargo to, from and through Florida.

First, here's a little background on the state's relationship with the seaports. While Florida's ports are public entities, they are not governed by a state port authority, but are independently and individually governed. However, Florida's ports are also partners with the state in a unique organization called the Florida Seaport Transportation and Economic Development (FSTED) Council. This program gives the seaports a regular source of state matching funding, while preserving their ability to choose projects based on market demand.

The market is the key driver of port investment needs, and the state acts to facilitate and leverage those investments. The ports benefit from additional resources, and the state benefits by achieving substantial returns on its investments, including jobs and economic growth. The department has a performance-based framework in place to measure and track these benefits and to ensure the soundness of state investments. Florida's transportation system must be ready to support private sector generated growth in an efficient and interconnected fashion. The department will continue to invest in Florida's transportation facilities, including seaports, using this market driven approach and maximizing Florida's return on investment.

In order to unleash the power of the free market and private capital, we must make investments in our state's ports and reduce the barriers for shippers and logistics firms to move freight and cargo through our state. By increasing imports and exports, the state's economy will grow and Florida will be the economic engine for the entire country.

Florida, under the leadership of Governor Scott, is determined and focused on being a major player in trade flow and logistics and I am committed to make sure that the transportation infrastructure is the strongest link.

FLORIDA'S SEAPORTS: Charting a Course for Economic Success

Our Course

Florida is at a critical point in time, when improving transportation infrastructure and expanding capacity to move goods will define our future economy. Strategic investments in seaports can transform Florida into a top global hub in the U.S., bringing thousands of high paying jobs to our shores. If these investments are not made, economic damage such as slower freight delivery, unpredictability in supply chains, diminished competitiveness of businesses, and increased cost of consumer goods can occur – all caused by overstressed or neglected transportation infrastructure.

Economists have repeatedly pointed to international trade as a leading growth sector for Florida and our most attainable opportunity to enhance our state's economy. Approximately 90 percent of world trade is carried by the international shipping industry. If Florida can enhance its existing relationships with South American countries and capture a fraction of the new business prospects in Asian markets via the Suez and Panama Canals, our economy could see immense economic benefits.

Fortunately, Florida's seaports and their leadership have the shared focus of seizing these opportunities. Funding for Florida seaports and other transportation infrastructure increased for the past two years, due to the governor and state legislature understanding the considerable benefits that can be gained by these investments. High-quality infrastructure will be critical to boosting Florida's ability to attract jobs and increase investments by global companies.

Connecting to Critical Global Markets

Florida's location at the center of the hemisphere places it squarely at the crossroads of international commerce. The state's trade with more than 220 global partners encompasses the world. In particular, Florida's distinctive role as the Gateway to Latin America brings two-way trade, transportation, and jobs together – strengthening both the state's economy and the developing economies of the state's partners.

In addition, the opening of the Panama Canal's larger locks in 2014 and the expanded commodity flows from Southeast Asia through the Suez Canal are impacting trade patterns, which offer new global opportunities through Florida's sea and air gateways.

Florida seaports have built on their natural advantages, and, as a result, the value and volume of goods and passengers moving through Florida's seaports and transportation systems is growing. Florida's international trade totaled more than \$149 billion in 2011 and that number is up by more than 18 percent over the previous year.

Florida is not alone in seeking to take advantage of these new global opportunities. Florida must be ready for this new era of global competition in order to attract, retain, and grow the dynamic jobs of companies around the world. These companies have a wide range of choices of where to locate and transportation efficiencies are a major consideration. Not improving Florida's infrastructure could mean the loss of future investments and jobs to other states and other countries. Florida cannot simply rely upon location and climate to attract and retain these companies.

Seaports supply thousands of construction jobs and, more importantly, permanent jobs. This is important because port jobs are good jobs – including all income levels – providing a rare opportunity for upward mobility for deserving workers. In fact, according to the Florida Ports Council's 2012 Priority Seaport Projects: An Economic Analysis, the top 15 priority seaport

projects in Florida will support more than 12,000 one-time construction jobs and almost 13,000 annual jobs after project completion. Florida's seaports have \$2.7 billion in capital projects expenditures programmed over the next five years, to deepen channels and harbors, build new cargo and cruise terminals and rehabilitate berths.

Because of Florida's connection to growing economies around the world, it was able to more effectively weather the global economic downturn. However, Florida needs to leverage existing partnerships and capture new opportunities for our economy to fully rebound and achieve true growth beyond recovery.

Leading the Cruise Industry in the U.S.

Florida's seaports serve as the face of America to the world of cruising. The cruise industry brings \$6.3 billion in spending to the state –35 percent of the industry's 2010 direct expenditures. It also provides a total of 123,000 jobs and pays \$5.3

billion in wages. Florida cruise operations account for nearly 60 percent of all U.S. embarkations – handling 13.5 million cruise passengers in 2011. PortMiami, Port Everglades and Port Canaveral continue to lead the nation in cruises and cruise passengers.

As cruising grows in popularity, Florida can build on its historic success and increase its dominance by attracting new partners and providing best-in-class facilities. Already home to some of the newest of the cruise mega-ships, Florida's seaports are actively planning and preparing cruise facilities that will provide the necessary services, amenities and accessibility to attract more of these ships to the state, without compromising service to smaller ships and port-of-call vessels.

Capturing Export Opportunities

Florida's seaports do something most other states can only envy: they run a trade surplus, shipping out more domestic goods than the international goods received. This is courtesy of neighbors to the south like Brazil, Florida's number one trading partner, who has a \$13 billion trade surplus. Although container volumes and values were up, with more than 100 million tons of cargo in 2011, additional opportunities abound on the import-driven east-west trade routes. Seaports are working to ensure every import container gets returned at a reasonable price brimming with Florida export goods.

The ability to export goods at a low cost will help current businesses expand their markets, allow the entry of new businesses to certain foreign markets, and help attract advanced manufacturing and other export-related industries to Florida. There are substantial opportunities to fill containers returning empty with Florida goods and greatly assist our businesses in getting their products to international markets, especially with many of Florida's seaports already oriented towards exports.

The goods that make up the state's top import and export lists are diverse, but surprisingly consistent from year to year. The large diversity among global partners helps stabilize and increase Florida's trade, even in the face of global market shifts and fluctuating economies. The consistency of imports and exports provides the goods needed for the state's growing population and regional partners. Although U.S. cargo volumes have been increasing since 2009, the value of *Florida's waterborne trade is*

growing fast enough to create an increase in the state's share of U.S. trade, a remarkable feat given the rapid recovery under way at most American west coast ports.

Florida's seaports will help the state emerge as a global hub for trade and investment, leveraging Florida's population growth and location on north-south *and* east-west trade lanes to become a critical point for processing, assembling, and shipping goods to markets throughout the eastern U.S., Canada, the Caribbean and Latin America. Florida's seaports accomplish these goals because they lead the nation in balanced imports and exports, and *they are expanding capacity and using that capacity in strategic ways*.

Shifting Trade Routes

On its centennial in 2014 the Panama Canal will have re-created itself as an exceedingly influential waterway. An expanded canal will influence the diversion of cargo now arriving through West Coast ports to Gulf and East Coast ports as carriers look for less expensive ports with shorter waits and more carrier-friendly operations.

Florida's seaports have well-crafted plans firmly in place to capitalize on the Panama Canal expansion. Some are positioned to attract additional Asian-direct waterborne services and others are determined to increase transshipments from container hubs in Central America and the Caribbean.

Florida's seaports have well-crafted plans firmly

in place to capitalize on the expansion. Some are positioned to attract additional Asian-direct waterborne services and others are determined to increase transshipments from container hubs in Central America and the Caribbean. Several of the largest container ports are planning and expediting dredge projects to facilitate post-Panamax vessel access, and they are purchasing super post-Panamax cranes and upgrading infrastructure. As an added benefit, the port and channel deepening will make the state more marketable to vessels plying non-Panama Canal routes, as container and bulk new builds continue to get larger.

Growing Relationships with Emerging Economies

An important opportunity for Florida's business community is now available courtesy of federally negotiated free-trade agreements. Many of the FTA countries – including the Dominican Republic, Costa Rica, and Chile – are already showing multi-billion increases to their merchandise trade with Florida since the onset of their agreements. Cutting tariff and non-tariff barriers to trade will increase the competitiveness of many goods.

Florida's seaports are anticipating market growth and are building on their successful experiences with current partners (working closely with private interests, economic development entities and others) to ensure vessel services and facilities are in place to handle newly attractive commodities from prospective free trade partner countries such as Colombia and Panama.

In 2011, Florida's trade with Cuba, exports of primarily agricultural products, totaled \$86.8 million. With possible changes in the future, trade with Cuba may be a significant opportunity for many of our ports. Florida's seaports are anticipating a continued expansion of humanitarian and agricultural movements, and are preparing for future trade with post-Castro Cuba.

When the seaports succeed, so does the state.

Expanding Distribution Efficiencies

Seaports have always been challenged by the need for efficient landside access. In recent years the nation's Class I railways have made such tremendous strides in increasing their efficiencies that having direct access can significantly impact a port's long-haul business. Florida's seaports are building on-dock rail, Intermodal Container Transfer Facilities, near-port storage yards, and utilizing distribution centers to connect to more-efficient long-haul rail services.

Seaports throughout the state are working diligently to better serve global partners as well as the state's growing population. They are improving supply chain networks – especially road and rail connectivity – to increase distribution efficiencies and accommodate growing trade volumes.

Our Future

Seaports are an undeniably important catalyst for growing businesses, generating jobs and enhancing Florida's quality of life. The state economy relies on the efficiency and capacity of Florida's seaports. When the seaports succeed, so does the state. The growth opportunities on the horizon reinforce the urgency of expanding Florida's trade infrastructure capacity so that it can sharpen its competitive edge.

With dedicated leadership, innovative port management, and expeditious investment geared toward capturing new business and regaining cargo moving through other states, Florida's seaports will be a strong link in the logistics chain. Leadership in the Sunshine State is committed to expanding private sector jobs and is investing in innovative and critical infrastructure to safeguard the future of the state seaports and economy.

Florida seaports are committed to partnering to attain diversified funding sources, to ensure an efficient system that provides consumers and businesses the choices they demand at prices they can afford, and to affirm Florida's competitiveness in the global economy.

With Florida's leadership, seaports, and business community focused on the future, we are charting a course to economic success that will benefit all Floridians.
